IDEXX Telemedicine Consultants

Better medicine together

Radiology, cardiology, specialty services, and more—everything we do is focused on helping you take swift, precise action to improve outcomes for your patients.

Our consultants work collaboratively with you to ensure that your experience is easy and professionally rewarding. You’ll receive a critical understanding of the specialized medicine behind each evaluation along with a detailed report.
Routine: Reports returned within 48 hours*

Our sole focus is the patient. We prioritize cases based on medical need, and you can help by choosing the case type that most accurately describes your patient’s condition. This allows us to focus on helping all of our customers achieve the best outcomes for their patients. When submitting your radiology request on vetmedstat.com, you will be asked to select one of the following service types:

Nonurgent: Select this service type when a patient issue is not medically urgent (hip dysplasia screens, senior screens, chronic follow-ups, chronic lameness, etc.). We’ll provide answers at a reduced cost, usually within 1–3 days.*

Routine: Select this service type when a patient is sick or in the hospital and you need answers quickly. We’ll deliver results, usually within a day.*

Priority: Select this service type when you need expedited answers.

STAT: For critical patients.

*Ileradiology services are in high demand and turnaround times are impacted by demand fluctuations. Refer to vetmedstat.com for current turnaround times and select the service type that best represents your patient’s medical need.

“...” — Jordan DeVault, DVM, Medical Director, Nipomo Dog & Cat Hospital
Insights for routine and complex cases. Our radiology consultants offer expert interpretations to help you improve patient health and maximize your investment in digital technology.

Small animal services available 24/7/365

Radiology consults
A radiologist provides a detailed written interpretation of radiographs, ultrasound, and/or fluoroscopy in conjunction with patient medical history.
- Nonurgent: Reports usually returned in 1–3 days
- Routine: Reports usually returned same day
- Priority: Reports usually returned within 2–4 hours
- STAT: Reports usually returned within 1 hour

Note: Check vetmedstat.com for current turnaround times.

Advanced imaging consults
A radiologist provides a detailed written interpretation of an MRI or a CT in conjunction with patient medical history.
- Routine: Reports returned within 24 hours
- Priority: Reports returned within 12 hours
- STAT: Reports returned within 4 hours

Equine and large-animal services available Monday–Friday

Radiology consults
A radiologist provides a detailed written interpretation of radiographs in conjunction with patient medical history.
- Routine: Reports returned within 24 hours

Advanced imaging consults
A radiologist provides a detailed written interpretation of an MRI or a CT in conjunction with patient medical history.
- Routine: Reports returned within 48 hours*

Prepurchase evaluation
Two radiologists review each exam and provide a detailed written interpretation of the radiographs in conjunction with the patient medical history.

Meet our team of radiologists at idexx.com/radiologists

Note: Second opinions may incur an additional charge.

*Turnaround times may be longer during peak times. Additional fees may apply.
Cardiology services

Fast answers for matters of the heart. From pre-op assessments to in-depth cardiology evaluations, we’re ready with fast answers that are easy for you to put into action.

Service available Monday–Friday 7:30 a.m.–11:00 p.m. ET, Saturday 9:00 a.m.–6:00 p.m. ET, Sunday 12:00 p.m.–4:00 p.m. ET

Cardiac consults
A cardiologist provides a detailed written assessment of a radiograph/echocardiogram/ECG in conjunction with patient medical history. The report provides diagnostic and therapeutic recommendations.
- Routine: Reports returned within 8 hours
- STAT: Reports returned within 1 hour
- Super STAT: Telephone callback within minutes

Cardiac screens
Brief assessments without therapeutic recommendations.
- ECG screen: Reports returned within 30 minutes*

Meet our team of cardiologists at idexx.com/cardiologists

*On average, ECG screens are returned in under 10 minutes.
Expert second opinions. Quick second opinions or treatment recommendations from a respected peer.

Services available Monday–Friday

**Internist consults**
An internist provides a detailed written treatment plan based on patient medical history, laboratory tests, and radiologist’s interpretation. Abdominal ultrasound with interpretation is also available.

- **Routine:** Reports returned within 24 hours

**Dental consults**
A dentist provides a detailed written interpretation of dental radiographs and/or photos in conjunction with patient medical history.

- **Routine:** Reports returned same day*

**Dermatology consults**
A dermatologist provides a detailed written interpretation based on pathology report and/or photos in conjunction with patient medical history.

- **Routine:** Reports returned within 1–3 days

**Exotic consults**
This service is designed for all exotic or zoological species including mammals, birds, reptiles, amphibians, invertebrates, and fish. A zoological medicine specialist provides a detailed written interpretation of radiographs, ultrasounds, pathology, or additional diagnostic modalities in conjunction with patient medical history. The report provides additional diagnostic options and therapeutic recommendations.

- **Routine:** Reports returned within 24 hours

Meet our team of specialty consultants at idexx.com/specialtyconsultants

*Same-day turnaround time available Monday–Friday 11:00 a.m.–8:00 p.m. ET.*
Screen without skipping a beat

CardioPet® ECG screens are the easy, fast, affordable way to identify potentially hard-to-detect arrhythmias prior to anesthesia.

1 in 20 dogs have an arrhythmia that could be missed without an ECG.†

1 in 25 cats have an arrhythmia that could be missed without an ECG.†

Routine ECG screens fit into your workflow with the CardioPet® ECG Device

• Capture ECGs in just 3 minutes.
• Review 6 leads at once on a single screen.
• Get results in under 10 minutes on average.*

CardioPet® ECG Plans make routine ECG screens affordable

Enroll today! Learn more at 1-800-726-1212 or idexx.com/ecgplans.

*Times and prices may vary. Results guaranteed in under 30 minutes.

†Offer valid only for practices that have not yet purchased a CardioPet ECG Device. A 12-month commitment is required.

Note: Newly enrolled practices may earn two IDEXX Points for each case submitted. Each IDEXX Point is worth one dollar toward the purchase of any IDEXX product or service (no cash value). See idexx.com/points for terms and conditions. Charges for ECG screens performed over the monthly plan allotment will be assessed at the cost of an individual screen indicated in the plan contract.

Standard terms and conditions: Unless otherwise agreed in an agreement signed by IDEXX Laboratories, Inc. or one of its affiliates, all services that we provide you, including laboratory testing services, consulting services, data collection, analysis and interpretation, and other reference laboratory-related services, are governed only by our standard terms and conditions found at idexx.com/naterms. Your purchase or use of our services indicates your acceptance of these standard terms.

Notice to veterinarians: IDEXX Telemedicine Consultants provides consultation and interpretation services on a professional-to-professional basis. Without personally having made a physical examination of and conducted all tests on a patient, IDEXX veterinarians, in providing consultations and interpreting test results, rely on data communicated by you, the licensed primary care veterinarian. By providing consultations, IDEXX does not purport to diagnose or treat your patient. As with any diagnosis or treatment, you should use clinical discretion with each patient based on a complete evaluation of the patient, including history, physical presentation, and complete laboratory data. With respect to any drug therapy or monitoring program, you should refer to product inserts for a complete description of dosages, indications, interactions, and cautions. Diagnoses and treatment decisions are the ultimate responsibility of the primary care veterinarian.
