IDEXX Telemedicine Consultants
Better medicine together

Radiology, cardiology, specialty services, and more—everything we do is focused on helping you take swift, precise action to improve outcomes for your patients.

Our consultants work collaboratively with you to ensure that your experience is easy and professionally rewarding. You’ll receive a critical understanding of the specialized medicine behind each evaluation along with a detailed report.
Our sole focus is the patient. We prioritize cases based on medical need, and you can help by choosing the case type that most accurately describes your patient’s condition. This allows us to focus on helping all of our customers achieve the best outcomes for their patients. When submitting your radiology request on vetmedstat.com you will be asked to select one of the following service types:

**Non-urgent:** Select this service type when a patient issue is not medically urgent (hip dysplasia screens, senior screens, chronic follow-ups, chronic lameness, etc.). We’ll provide answers at a reduced cost, usually within 1–3 days.*

**Priority:** Select this service type when a patient is sick or in the hospital and you need answers quickly. We’ll deliver results, usually within a day.*

**STAT:** Select this service type when a patient is critical and you need answers within the hour. You’ll receive results in about one hour or less.

*Teleradiology services are in high demand and turnaround times are impacted by demand fluctuations. Refer to VetMedStat.com for current turnaround times and select the service type that best represents your patient’s medical need.

“We would have had no idea to take extra precautions with this patient prior to adding ECGs to our preanesthetic protocols. This is amazing. We are so happy we signed up for this.”
