

No specimen? No problem.

Use IDEXX completion test codes to submit your specimen at a later date.

It happens. You place an order for an IDEXX Reference Laboratories test, and—for whatever reason—you are unable to obtain the required specimen to submit. Now, with IDEXX completion test codes, you can submit specimens for certain IDEXX Reference Laboratories profiles for up to four weeks following the original submission date.

How to use IDEXX completion test codes:

Completion test codes are an effortless way for you and your team to ensure that your IDEXX Reference Laboratories test order is completed.

1. Begin a new test requisition. Locate the completion test code below (or in the IDEXX Directory of Tests and Services) for the specimen you are submitting.
2. Confirm that it has been less than 28 days since the original test requisition submission and that the patient's first and last names match the exact spelling that appeared on the original test requisition to avoid unexpected charges.
3. Submit the newly created test requisition form with the specimen and the corresponding completion test code. Submitting a copy of the original test requisition form may result in a testing delay.

Note: For completion of Cancer Dx as part of a profile, both a EDTA whole blood specimen and serum specimen is required and must be received together with a single requisition form with the appropriate Cancer Dx completion test code ordered.

If you use the IDEXX FecalChek® Home Collection Kit to submit a fecal submission completion test code, then you must submit a new test requisition form. The new test requisition form should contain only the fecal completion test code and should accompany the specimen submitted by your client. Please do not submit fecal completion codes using a copy of the original test requisition form on which other laboratory testing was previously ordered as doing so may result in a testing delay.

Example: Your original IDEXX Reference Laboratories test order contained a urinalysis component, but a urine specimen was not provided with the original submission. On a new test requisition, you would simply use completion test code 9100/Urine to Complete Urinalysis to complete your order. This easy-to-use process can be utilized for up to four weeks following the original submission date.

IDEXX COMPLETION TEST CODES		
Code	Name	Specimen requirements
90200	Serum and Whole Blood to Complete IDEXX Cancer Dx Test-Canine	1 mL LTT and 2 mL Serum
51990	Fecal to Complete Fecal Dx® Antigen Panel	3–5 g fresh feces in a clean plastic container
52990	Fecal to Complete Fecal Dx® Antigen Panel with <i>Giardia</i>	3–5 g fresh feces in a clean plastic container
50130	Fecal to Complete Fecal Dx® Profile	3–5 g fresh feces in a clean plastic container
246390	Fecal to Complete Fecal Dx® Profile with <i>Giardia</i>	3–5 g fresh feces in a clean plastic container
50100	Fecal to Complete Fecal Ova and Parasites	3–5 g fresh feces in a clean plastic container
24630	Fecal to Complete Fecal Ova and Parasites with <i>Giardia</i>	3–5 g fresh feces in a clean plastic container
9100	Urine to Complete Urinalysis	5 mL of urine in a sterile container
95000	Urine to Complete Urinalysis with Reflex UPC (if Indicated)	5 mL of urine in a sterile container
94000	Urine to Complete Urinalysis with UPC	5 mL of urine in a sterile container
99400	Urine to Complete UPC	5 mL of urine in a sterile container
93000	Urine to Complete Urinalysis with IDEXX Cystatin B Test—Canine/Feline	5 mL of urine in a sterile container
23260	Urine to Complete Urinalysis with IDEXX Cystatin B Test and Reflex UPC (if Indicated)—Canine/Feline	5 mL of urine in a sterile container
9200	Urine to Complete Urinalysis with IDEXX Cystatin B Test and UPC—Canine/Feline	5 mL of urine in a sterile container
96000	Urine to Complete UPC with IDEXX Cystatin B Test—Canine/Feline	5 mL of urine in a sterile container
88720*	Urine to Complete IDEXX Cystatin B Test—Canine/Feline	5 mL of urine in a sterile container

IDEXX COMPLETION TEST CODES - continued		
Code	Name	Specimen requirements
191500	Serum to Complete Chem 10 with IDEXX SDMA® Test	1 mL serum
11100	Serum to Complete Chem 25 with IDEXX SDMA® Test	2 mL serum
11132	Serum to Complete Chem 27 with IDEXX SDMA® Test	2 mL serum
80400	Serum Specimen to Complete Total T4	1 mL Serum
37500	Whole Blood to Complete IDEXX CBC®	1 mL LTT
3000	Whole Blood to Complete IDEXX CBC-Select®	1 mL LTT

Please check that these codes are linked properly in your practice management software.
Keep this information handy and share with your entire team.
