Social media tips

- + Share educational articles and useful reminders with pet owners! For example, explain the importance of regular blood work, especially when their pet is sick.
- + Showcase photos and videos of your team performing diagnostic tests to educate pet owners on the “why” and to highlight their value.
- + Share patient success stories (with the pet owner’s permission) to demonstrate how these tests can detect issues early and enable timely, effective treatment.
- + Engage with your followers! Encourage pet owners to leave questions in the comments or send direct messages. These interactions help build community and reinforce the relationship with the pet owner.
- + Highlight your practice’s new technology to showcase your commitment to deliver high-quality care for pets.
