

The accurate Catalyst SDMA Test you know and trust. Now upgraded.

Easier to use. Faster results. And simple freezer storage with other routine slides.

Kidneys are earlier indicators of many aspects of kidney health. By including the new Catalyst® SDMA Test with every chemistry panel, it's now easier than ever to hear everything kidneys have to say.

Learn more about the Catalyst SDMA Test improvements, watch a short video on how easy it is to run, read FAQs, and get staff training at idexx.com/newSDMA.

What's changed

- + Convenient storage: Now in the freezer, making it easier to grab and go when getting other Catalyst® slides.
- + Simpler workflow and faster results: No more reagent cups. Now that the reagent has been incorporated into the slide, you can simply add the slide to your chemistry run for faster results.
- + New product numbers: Just sign in to IDEXX Online Orders to see all the ways to order SDMA with your other chemistries.
- + Ordering kits: The Catalyst SDMA and Total T₄ Kit will be discontinued, but the tests can still be purchased as a bundle.

What's staying the same

- + The industry-leading, reliable accuracy you've come to expect so you can gain deeper insights into kidney function.
- + Ordering convenience: SDMA will still be included in your most commonly run profiles—get everything you need in one click.
- + Flexibility to add to any panel in any order.
- + Same quantity, less bulk: You'll still get 12 tests per box, but smaller packaging means easier storage and less waste.
