

# Last month, we caught [ ] diagnostic abnormalities in [ ] pets that appeared healthy.

Your pet can't tell you when something is wrong. Our preventive care diagnostics can. Preventive care is a proactive approach to your pet's health care that focuses on disease prevention and optimal quality of life.

## Benefits of preventive care

- Provides a baseline result for your unique pet used by our staff to reference in the future
- Offers a cost-effective way to manage your pet's health
- Detects health problems early when they can be easily managed
- Can minimize the impact of chronic health conditions
- Can help extend the length and improve the quality of your pet's life

## Preventive care diagnostics may include

- Physical examination by a veterinarian
- Recommended annual screening of blood, urine, and stool
- Personalized screening recommendations for pets with special health concerns every 6 months
- Your veterinarian will make recommendations based on your pet's needs
