

# SDMA adds value to every patient's chemistry profile

In medical cases (excluding wellness) increased SDMA was the 3rd most common abnormality.

Over **1** million profiles

Increased SDMA was twice as common as increased creatinine

**17%**

↑ SDMA

**8%**

↑ Creatinine

SDMA identified

**2X**

more patients with reduced glomerular filtration rate (GFR)

- Canine and feline patients were included in the analysis
- Medical Cases
  - Includes sick, preanesthetic profiles and rechecks
  - Excludes known wellness visits
