</tbody>
</table>

Run these tests on either the SNAP Pro® Analyzer or the SNAPshot Dx® Analyzer

**SNAP® Lepto Test**
First and only pet-side ELISA for the detection of antibodies to canine leptospirosis
Supports immediate treatment in pets suspected of leptospirosis.

Run this test on the SNAP Pro® Analyzer

**KEY**
- Development time in minutes
- Store at room temperature or in refrigerator
- Store in refrigerator
- Number of tests per kit
- ALL components MUST be at room temperature before running the test.

Visit idexx.com/order for in-house diagnostic tests.
Questions about in-house diagnostic testing? Call 1-888-79-IDEXX

Pancreatic tests

**SNAP® cPL Test**
Identify canine pancreatitis pet-side, in minutes
Get more diagnostic information than serum lipase testing can provide with the only pet-side ELISA to measure canine pancreas-specific lipase levels.

**SNAP® fPL Test**
Assess feline pancreatitis pet-side, in minutes
Assess pancreatic inflammation in cats in minutes with the only pet-side ELISA to measure feline pancreas-specific lipase levels.

**SNAP® cPL™ Test**
Identify canine pancreatitis pet-side, in minutes
Get more diagnostic information than serum lipase testing can provide with the only pet-side ELISA to measure canine pancreas-specific lipase levels.

**SNAP® fPL™ Test**
Assess feline pancreatitis pet-side, in minutes
Assess pancreatic inflammation in cats in minutes with the only pet-side ELISA to measure feline pancreas-specific lipase levels.

**Cardiac test**

**SNAP® Feline proBNP Test**
Identify cats with an increased risk for heart disease, pet-side
Assess the cardiac health of at-risk felines and recommend follow-up diagnostics using the only pet-side blood test to measure NT-proBNP, the most well-studied cardiac biomarker.

**Equine test**

**SNAP® Foal IgG Test**
Test foals shortly after birth at point-of-care
Detect low levels of IgG in as few as 7 minutes, so you can begin lifesaving treatment immediately.

**SNAP® fPL™ Test**
Assess feline pancreatitis pet-side, in minutes
Assess pancreatic inflammation in cats in minutes with the only pet-side ELISA to measure feline pancreas-specific lipase levels.

Run these tests on either the SNAP Pro Analyzer or the SNAPshot Dx Analyzer.

One SNAP can change everything.

There’s only one pet-side test that snaps: the IDEXX SNAP test. It’s the snap that activates reference laboratory technology to ensure accurate results and the right decisions for your patients.

If an IDEXX test does not perform as promised, simply call us and we will credit your IDEXX Points account with 100% of the test’s value in points.
Stay focused on your patients

The SNAP Pro® Analyzer with new ProRead™ software activates, times, and interprets your SNAP® test results for you.

**SNAP Pro® Analyzer**

View interpreted results at a glance for quick and accurate health assessments and better staff efficiency.

Connect for the benefits of two-way integration: reduce missed charges and automatically include results in your patients’ medical records.

Visit idexx.com/snappro to learn more.

Worry-free results

Just add sample, load a SNAP® test into the analyzer, and walk away. The SNAP Pro Analyzer will take it from there!
SNAPshot Dx® Analyzer

Identify and manage diseases quickly and efficiently
Snap, load, and go: results are automatically read and interpreted in minutes.
Run multiple patient samples at once.
Rely on proven SNAP® ELISA technology and an advanced optical system.
Visit idexx.com/snapshotdx to learn more.

SNAPshot Dx-exclusive tests

<table>
<thead>
<tr>
<th>Test Type</th>
<th>Description</th>

</thead>
<tbody>
<tr>
<td>SNAP® Total T4 Test</td>
<td>Screen for thyroid disease</td>
</tr>
<tr>
<td>SNAP® Cortisol Test</td>
<td>Quickly evaluate adrenal function, screen for endocrine diseases and monitor long-term medications for quick adjustments, as necessary.</td>
</tr>
<tr>
<td>SNAP® Bile Acids Test</td>
<td>Quickly assess liver function, use to help diagnose disease, such as portosystemic shunts.</td>
</tr>
</tbody>
</table>

Run these tests on the SNAPshot Dx Analyzer

KEY
- Development time in minutes.
- Store at room temperature or in refrigerator.
- Store in refrigerator.
- Number of tests per kit. ALL components MUST be at room temperature before running the test.

Questions about in-house diagnostic testing? Call 1-888-79-IDEXX
In-house chemistry

Chemistry, electrolytes, and total T₄ results in real time.
Visit idexx.com/productguide to explore all IDEXX analyzers and related tests.

Get results during the patient visit for improved pet owner understanding and compliance.

Rely on an expanding menu of 30 tests, including advanced diagnostics—like fructosamine, phenobarbital, and urine P:C ratio.

Choose the tests you want to run with 7 preloaded CLIPs or 30 single slides.

Save hands-on time with onboard whole blood separation, automated sample pipetting, and dilutions.

**Catalyst One® Chemistry Analyzer**

Diag nostic insight, work-flow efficiency, integrated information

Chemistry and electrolyte results in only 8 minutes and total T₄ in approximately 15 minutes.
Load and go.

**Catalyst Dx® Chemistry Analyzer**

Manage more cases simply and efficiently. Run multiple samples for results in minutes.
Load and go: run multiple samples for results in minutes.
Chemistry and electrolyte results in only 8 minutes and total T₄ in approximately 15 minutes.

**Featured tests**

- **Total T₄**
  Thyroid screening, diagnosis, and management with confidence during the patient visit, all with one sample and one run.
  Available now for the Catalyst One and the Catalyst Dx chemistry analyzers.

- **Fructosamine**
  Better diagnose and manage your diabetic patients with rapid results.

- **Urine P:C ratio**
  Identify and monitor proteinuria.

- **Phenobarbital**
  Monitor and adjust phenobarbital levels.

Order in-house diagnostic tests at idexx.com/order
CLIPs

Chem 17 CLIP
A comprehensive chemistry profile with amylase and lipase, making it ideal for canine patients. Combine with a CBC, electrolytes, and tests such as total T4, when indicated.

<table>

What makes IDEXX analyzers so smart? They listen.
With IDEXX integration technology, your data flows back and forth between your practice management software and IDEXX in-house analyzers. This “two-way conversation” streamlines work flows and captures charges automatically.

Questions about in-house diagnostic testing? Call 1-888-79-IDEXX
In-house hematology
Access reference laboratory-quality technology in real time.
Visit idexx.com/productguide to explore all IDEXX analyzers and related tests.

**ProCyte Dx® Hematology Analyzer**

Three cutting-edge technologies, 2 minutes, unprecedented accuracy
Dot plots generated as a visual representation of the complete blood count make it easy to interpret and validate results.

<table>
<thead>
<tr>
<th>Test menu</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Band neutrophils</strong></td>
</tr>
<tr>
<td>Presence is the best indicator of inflammation.</td>
</tr>
<tr>
<td><strong>Nucleated red blood cells</strong></td>
</tr>
<tr>
<td>Presence indicates bone marrow damage or extreme increases in red blood cell production, both of which prompt quick action.</td>
</tr>
<tr>

</tbody>
</table>

Note: The number of reported parameters may vary according to species (e.g., reticulocytes are not reported for equine species).

**Supplies**

- **VetCollect® tubes**
  50 EDTA-formatted tubes; require the smallest sample size (0.5 mL).
  Note: Most purple-top EDTA blood collection tubes are compatible for use.

- **e-CHECK™ (XS) Control**
  Quality control ensures the reliability of the analyzer and reagent system, with the ability to monitor performance over time.
  IDEXX recommends quality control to be run on a monthly basis.
  The e-CHECK (XS) control is a stabilized whole blood matrix designed for statistical process control of the ProCyte Dx analyzer.
LaserCyte® Dx Hematology Analyzer

The first hematology analyzer to bring reference laboratory technology in-house

Advanced laser flow cytometry provides a true five-part white blood cell differential, absolute reticulocyte count, body fluid analysis capabilities, and more.

Supplies

CBC5R Kit
Reagents and sample collection supplies for 50 tests.

Test menu

24 Whole-blood parameters
- RBC (red blood cell count)
- HCT (hematocrit)

- %AGRANS
- GRANS
- %GRANS
- RBC

Note: The number of reported parameters may vary according to species (e.g., reticulocytes are not reported for equine species).

What’s the best way to detect disease in its early stages?

Obtain a minimum database, including a CBC, chemistry screen, and urinalysis. Go to idexx.com/steps to review the AAHA Guidelines and information about preventive care and other protocols.

If an IDEXX test does not perform as promised, simply call us and we will credit your IDEXX Points account with 100% of the test’s value in points.

Questions about in-house diagnostic testing? Call 1-888-79-IDEXX
In-house urinalysis

Urinalysis results in real time. Visit idexx.com/productguide to explore all IDEXX analyzers and related tests.

**SediVue Dx® Urine Sediment Analyzer**

The new standard for urine sediment analysis

In approximately three minutes, three cutting-edge technologies identify, classify, and quantify critically relevant particles from only 165 µL (4–5 drops) of urine. Analyzer produces high-resolution, high-contrast digital images.

Images may also be reviewed in VetConnect® PLUS anywhere, anytime.

**IDEXX VetLab® UA™ Analyzer**

Automatically reads and captures IDEXX UA™ Strip results

Save time and eliminate errors with one-button operation and results in about 80 seconds. Automatically integrate results with patient records and invoices.

**Test menu**

**IDEXX UA Strips**

Veterinary-specific strips for manual use or with the IDEXX VetLab UA Analyzer.

- pH, LEU*, PRO, KET, UBG, BIL, BLD/HGB

*Canine only.

Visit idexx.com/productguide to explore all IDEXX analyzers and related tests.

VetStat® Electrolyte and Blood Gas Analyzer

Fast, accurate results for more informed and confident fluid therapy choices
Get results in two minutes from venous or arterial whole blood samples with single-use cassettes. Portable and battery or AC-operated for use in the practice or the field.

Test menu

**Electrolytes**
Use this cassette for a more complete picture of your patient’s health.
Na⁺, K⁺, Cl⁻

**Electrolytes 8 Plus**
Run this cassette to identify and treat the causes of acid-base disorders.
Na⁺, K⁺, Cl⁻, pH, PCO₂, PO₂, Hb, SO₂, ICO₂, HCO₃⁻, base excess, anion gap

**Respiratory/Blood Gases**
Use this cassette for patients with respiratory disorders.
Na⁺, K⁺, Cl⁻, pH, PCO₂, PO₂, Hb, SO₂, ICO₂, HCO₃⁻, base excess, anion gap

**Ionized Calcium: Ca**
Confirm increases, decreases, and imbalances that can indicate serious disorders.

**Glucose: GLU**
Quickly assess glucose levels when treating hypoglycemic and diabetic patients.

Coag Dx™ Analyzer

Characterize bleeding disorders in seconds
Evaluate and monitor patients after a suspected snake bite or rodenticide poisoning, as well as screen animals prior to surgery to avoid complications.

Test menu

**aPTT Cartridge**
Activated partial thromboplastin screen for intrinsic and common coagulation pathway disorders. For use with fresh whole blood. Validated for canine and feline use.

**Citrate aPTT Cartridge**
Activated partial thromboplastin screen for intrinsic and common coagulation pathway disorders. For use with citrated whole blood. Validated for canine and feline use.

**PT Cartridge**
Prothrombin screen for extrinsic and common coagulation pathway disorders. For use with fresh whole blood. Validated for canine, feline, and equine use.

**Citrate PT Cartridge**
Prothrombin screen for extrinsic and common coagulation pathway disorders. For use with citrated whole blood. Validated for canine, feline, and equine use.

If an IDEXX test does not perform as promised, simply call us and we will credit your IDEXX Points account with 100% of the test’s value in points.
IDEXX Reference Laboratories

We offer complimentary consultations with board-certified veterinary specialists and pathologists along with a comprehensive diagnostic menu that includes exclusive tests. Visit idexx.com/productguide to explore all IDEXX products and services, including IDEXX Reference Laboratories.

**Essential panels and profiles**

Choose from a comprehensive list of chemistries, Fecal Dx™ antigen testing, and wellness testing. Diagnose and treat with great confidence by using IDEXX-exclusive specialty tests, which include the following:

- IDEXX SDMA™ Test
- Fecal Dx antigen testing (includes hookworm, roundworm, and whipworm antigens by ELISA)
- Lyme Quant Ce® Test
- Spec IPL® Test, Spec cPL® Test
- RealPCR™ test and panels
- Allergy testing and immunotherapy
- Leptospira spp. Antibody by ELISA
- Canine Cardiopet® proBNP Test, Feline Cardiopet® proBNP Test

Visit the Directory of Tests and Services at idexx.com/testdirectory for a complete list of tests.

**Expert consultations**

**Specialists and pathologists**

Your team of experts is just a call away. Speak with our board-certified veterinary specialists and pathologists for complimentary consultations. Specialty areas include:

- Internal medicine
- Anatomic pathology
- Clinical pathology
- Avian and exotics
- Dermatology
- Oncology

Call us any time at 1-888-433-9987 to discuss a specific case, a result, or anything related to our tests.

---

**IDEXX SDMA Test**

*A major breakthrough in veterinary diagnostics*

SDMA* is the most significant advancement in the field of veterinary medicine in the last 30 years. A renal biomarker specific to kidney function, SDMA has proven to be more reliable than creatinine, enabling veterinarians to detect and treat kidney disease months, or even years, earlier than ever before.

The IDEXX SDMA™ Test offers specific advantages. Included in routine chemistry panels from IDEXX Reference Laboratories at no additional charge, this veterinary-specific test measures SDMA directly from the sample. It can also be easily ordered as a stand-alone test to complement your in-house IDEXX chemistry panel.

With over 5 million patient results to draw upon, the IDEXX SDMA Test data supports the finding that kidney disease is over 2 times more common than previously reported, with a prevalence rate of 1 in 3 cats. This data also supports, that the prevalence of kidney disease is under-reported in all age groups, and increases with age.²

Capable of detecting kidney function loss as early as 25%, and included in the International Renal Interest Society (IRIS) Chronic Kidney Disease (CKD) Staging Guidelines, SDMA offers both a more reliable diagnostic option than creatinine and an opportunity for veterinarians to improve patients’ lives.²,³

Visit idexx.com/sdma for more information.

---

*Symmetric dimethylarginine.

Services and support

Working with you to provide the most value for your practice

Take advantage of daily courier and late pickup in most major metro areas.

Results by 8:00 a.m. next day for routine tests.*

Never miss a test result. Receive patient results by fax, online with VetConnect® PLUS, email, and automatic download to Cornerstone or other practice management systems.

View patient results immediately on your iPhone® or Android™ device with the VetConnect® PLUS app.

FecalChek Home Collection Kit

Increase your client compliance up to 20%†

The FecalChek™ Home Collection Kit makes it easy for pet owners to comply with Companion Animal Parasite Council (CAPC) intestinal parasite testing recommendations. And that’s a win for everyone.

Healthy pets: Reduce the risk of infection to other pets and family members with timely treatment.

Satisfied clients: Make it easy and convenient for pet owners. They simply collect the sample and drop the kit (which is addressed to IDEXX Reference Laboratories) into the nearest mailbox.

Healthy practice: Enhance your clients’ experience while increasing your diagnostic and treatment revenue.

IDEXX-exclusive reference laboratory tests

Parasite screening

For preventive care screening and diagnosing clinical disease

IDEXX has a full complement of routine and exclusive tests for parasite screening. This includes the Lab 4Dx® Plus Test, the Lyme Quant C6™ Test to measure active Lyme infection, the best available fecal flotation by centrifugation, and new breakthrough fecal antigen ELISAs for hookworm, roundworm, and whipworm detection.

Cardiac health

For a quantitative NT-proBNP concentration to help monitor your feline and canine patients’ cardiac health

Request the Cardiopet® proBNP Test for a quantitative analysis of your feline and canine patients’ cardiac health.

Pancreatic health

Quickly and confidently assess pancreatic health in dogs and cats

Our Spec CPL® Test for dogs and Spec IFL® Test for cats are the only tests that measure the level of pancreas-specific lipase in blood.

Itchy patients

Testing and treatment for itchy pets

An expanded portfolio of tests to assist in the diagnosis of itchy patients and the management of atopic dermatitis.

To learn more, visit idexx.com/itchypatients

IDEXX RealPCR™ tests and panels

Advanced real-time polymerase chain reaction (PCR) testing

Convenient and affordable access to over 50 IDEXX RealPCR™ panels and more than 150 individual IDEXX RealPCR tests give you definitive answers within 1–3 working days.

*Includes routine blood work and urinalysis (chemistry, CBC, coagulation, urinalysis, total T 4), common infectious disease tests (Lab 4Dx Plus Test, heartworm antigen, FIV and FeLV ELISAs), and fecal ova and parasites tests.

†All orders that include IDEXX in-house laboratory supplies are shipped with next-day delivery (available in the contiguous United States only). For next-day delivery, orders must be placed before 9:00 p.m. ET, Monday–Thursday. Friday–Sunday orders ship on Monday. All orders not eligible for next-day delivery are shipped via ground shipping with delivery within 3 business days. Shipping to all locations is free.
IDEXX Telemedicine Consultants

Working together for improved outcomes. Easy access to over 110 board-certified radiology, cardiology, and specialty consultants. Visit idexx.com/productguide to explore all IDEXX products and services, including IDEXX Telemedicine Consultants.

Diagnostic imaging

Streamline your work flow with high-quality images for a more confident, real-time diagnosis. Learn more at idexx.com/digital. Visit idexx.com/productguide to explore all IDEXX products and services, including digital imaging solutions.

**Imaging software**

**IDEXX-PACS™ Imaging Software**
The power behind all IDEXX digital imaging systems, and it adapts to your changing needs with automatic system upgrades.

**IDEXX Web PACS software**
Delivering clinical insight with every diagnostic image
View and share images in real time from any location. Images are securely stored online and always available to you. Delivers digital images as part of the comprehensive patient results through IDEXX VetConnect® PLUS.

**ImageVue™ DR50 Digital Imaging System**
Low-dose DR system with cesium iodide plate and patented Irradiation Side Sampling (ISS) technology
Reduces radiation exposure with quick capture that displays sharp, high-resolution images in under 8 seconds.
Integrates with Cornerstone® Software and other leading practice management software.

**ImageVue™ DR40 Digital Imaging System**
Direct-capture radiography (DR) system with amorphous selenium plate that delivers clearer, crisper images in just 8 seconds.
Integrates with Cornerstone Software and other leading practice management software.

**IDEXX I-Vision CR® System**
Computed radiography (CR) delivers sharp, detailed images in less than 1 minute.
Integrates with Cornerstone Software and other leading practice management software.

**IDEXX EliteVision® Digital Imaging System for equine care**
Wireless system for field or clinic use.
Sophisticated plate technology with faster exposure times minimizes motion artifacts.
IDEXX-PACS software integrates with the equine-specific Image Suite capture software.

**IDEXX I-Vision Mobile™ Application**
Efficiently and simply track, examine, and share your digital images from any room in your practice.
Integrates seamlessly with Cornerstone 8.2 or later versions and runs on Apple iPad® or Android™ tablets.

**IDEXX VetConnect® PLUS integration**
Make more informed, confident decisions with centralized access to your patients’ results—including digital images.
View and share images with clients and colleagues on demand, wherever and whenever you need them.
Information management and connectivity

Bring IDEXX in-house and IDEXX Reference Laboratories diagnostic information together for better patient care and client experiences. Visit idexx.com/productguide to explore all IDEXX products and services and discover how they work together.

VetConnect® PLUS

Make diagnostic decisions more quickly and confidently

Easily compare in-house results to reference laboratory results and see over 10 years of historical data.

View trending graphs that help you quickly spot abnormalities for individual patients.

Easily share client-friendly summaries that increase client understanding and add value to visits.

Now receive digital images with all cytology and biopsy results, at no additional cost, exclusively in VetConnect PLUS, for a more comprehensive diagnostic report.

Stay up-to-the-minute on every case with instant results notifications using the VetConnect® PLUS mobile app for iPhone® or Android™.

Visit vetconnectplus.com or download the app today.

Upload specific client lists for reminders and campaigns and only pay for one list at a time.

Pet Health Network® (pethealthnetwork.com)
Direct clients to this reliable, authoritative resource that covers all topics related to pet health.
IDEXXCare Plus support and other resources

Set your practice up for success with the education, training, support, and services you need.

IDEXXCare Plus product and service support

Every IDEXX customer who uses our in-house analyzers, SNAP® tests, diagnostic imaging equipment, or reference laboratories is automatically entitled to a comprehensive level of service and support. Visit idexx.com/idexxcare to learn more about IDEXXCare Plus.

Personal on-site support

Priority access to visits by your dedicated field support representative.*

• Count on expert installation and on-boarding of new technologies.
• Optimize your laboratory’s current performance with preventive instrument and software checkups.
• Implement successful protocol changes and enhance staff knowledge of sample preparation, instrument work flow, and test menus with education and full-staff trainings.
• Educate staff about new, advanced test menus with a convenient starter kit.
• Avoid running out of or overstocking product with inventory management assistance.

Technology for life

You’re on the leading edge with hardware and software enhancements.

• Trust that your IDEXX in-house instrumentation is monitored and proactive hardware upgrades are provided as deemed necessary.
• Receive point-of-service upgrades with the most up-to-date technology.
• Enjoy priority access to new, advanced test menu options with convenient starter kits.

Reliability promise

We’ll get your laboratory up and running quickly.

• Receive replacement analyzers when needed, with fast next-business-day expedited shipping.†
• Maximize your laboratory’s uptime and staff efficiency with our single-swap process.

*Up to two visits annually.

†Shipping schedule for expedited delivery: Instruments shipped Monday–Thursday with morning delivery will arrive the following morning. Instruments shipped Friday with Saturday delivery will arrive on Saturday. Not available in all locations.
Ongoing support

Keep your practice up and running.

- Count on 24/7 phone support when and where you need it, at 1-800-248-2483.
- Enjoy hassle-free returns on unopened, expired products, and complete replacement value for any test that does not perform as promised.*
- Maximize uptime and minimize phone time with IDEXX technical support with proactive system adjustments.

For more information on IDEXXCare Plus plans for in-house analyzers or diagnostic imaging equipment, contact 1-800-248-2483.

*Credit available for unopened tests in the form of IDEXX Points or replacement product at IDEXX discretion when ordered direct from IDEXX.
From the IDEXX Learning Center

Routine preventive care visits are the best way to stay on top of good health and to catch underlying illnesses as early as possible. Train your staff to talk with clients about providing consistent care for their pets.
