# Submitting dental radiographs to IDEXX Telemedicine Consultants

A radiographic review by our AVDC board-certified specialists helps ensure that hidden dental problems don't go undetected.

### Submission requirements

We recommend sending contralateral images of all dentition so we can provide a more accurate diagnosis. Full-mouth radiographs are essential for every patient and should include the following number of images based on the patient's type.

Patient type	Number of radiographic images
Cat	10 images
Small dog	14 images
Medium dog	14-18 images
Large dog	18-22 images

#### If the patient has a malocclusion

(Imperfect positioning of teeth when jaws are closed), include photographs with the radiographs. For other patients, photographs are optional but recommended.

#### Include a dental chart if possible

IDEXX Telemedicine offers complimentary dental charts from Self Help in your VetMedStat Account.

## How to submit dental radiographs to IDEXX Telemedicine Consultants

1. Send images to IDEXX Telemedicine Consultants from your digital imaging or PACS software.

2. Log in to <u>vetmedstat.com</u> from any computer, and select **Continue** on the case.

3. Provide the requested information and follow the on-screen instructions to upload radiographs, charts, and photos as necessary.

#### Example of a large breed canine full-mouth study

#### Maxilla right/left

#### Mandible right/left

#### Example of a feline full-mouth study

#### Maxilla right/left

#### Mandible right/left

#### Services are available Monday - Friday

An AVDC diplomate (dentist) will provide a detailed written interpretation of dental radiographs, dental charting +/- photographs in conjunction with patient medical history. CBCT (cone beam CT) interpretation is also available.

**Routine: Reports returned within 24 hours**
