

Working Smarter, Not Harder" with AI

8 Essential AI Tips for Veterinary
Practice

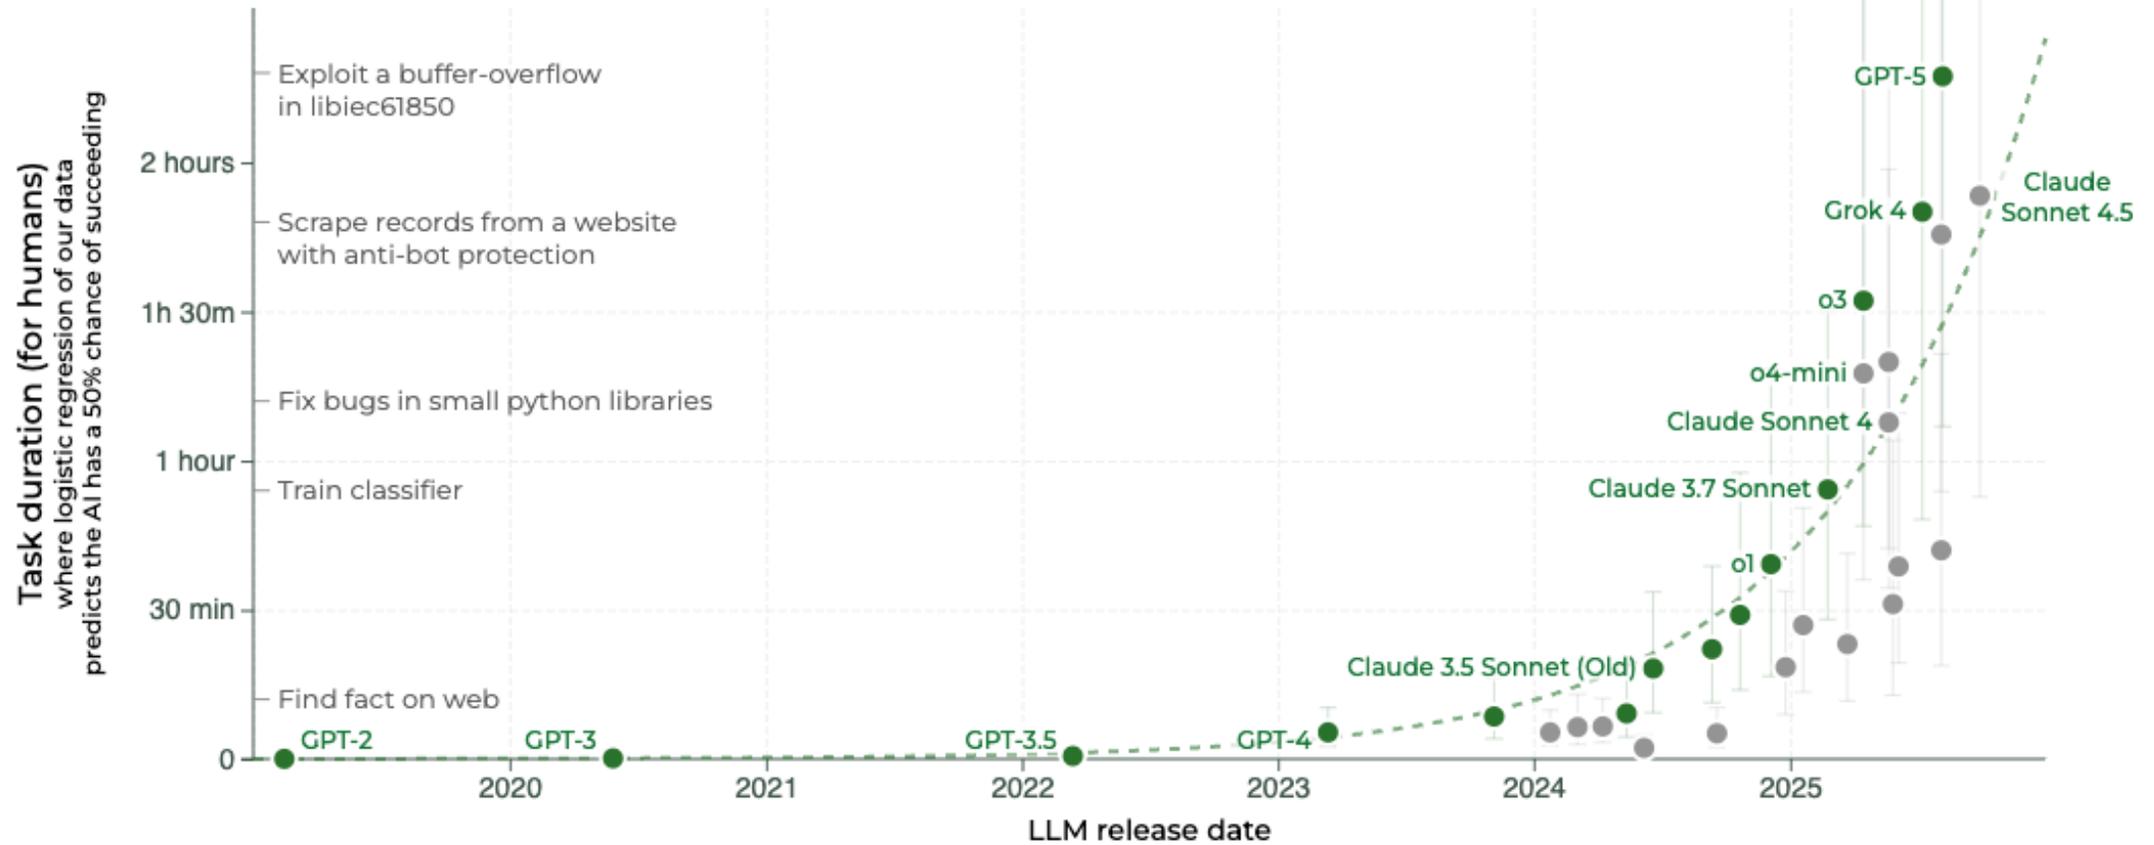

AI use is exploding. If you aren't already using it, you are playing catch-up

ChatGPT has >800M Weekly Active Users

The time-horizon of software engineering tasks different LLMs can complete 50% of the time

Digital AI in Veterinary Medicine Study 2024

Have you used AI tools in a veterinary setting?

4

39%

Yes

61%

No

Are you currently using any AI-based technology in your hospital's operations?

73%

Yes

27%

No

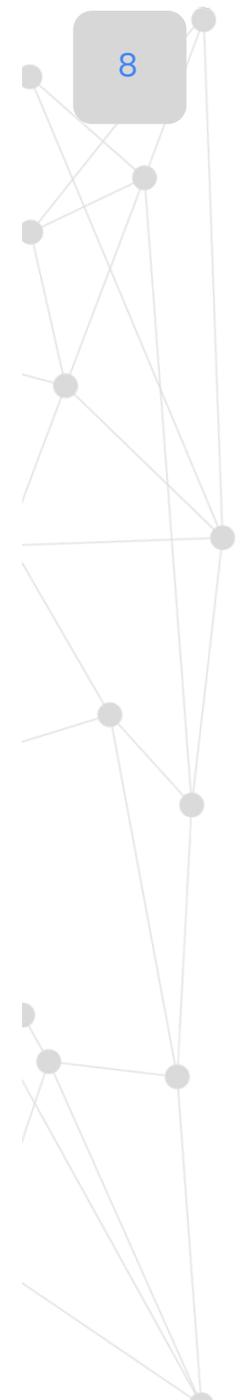

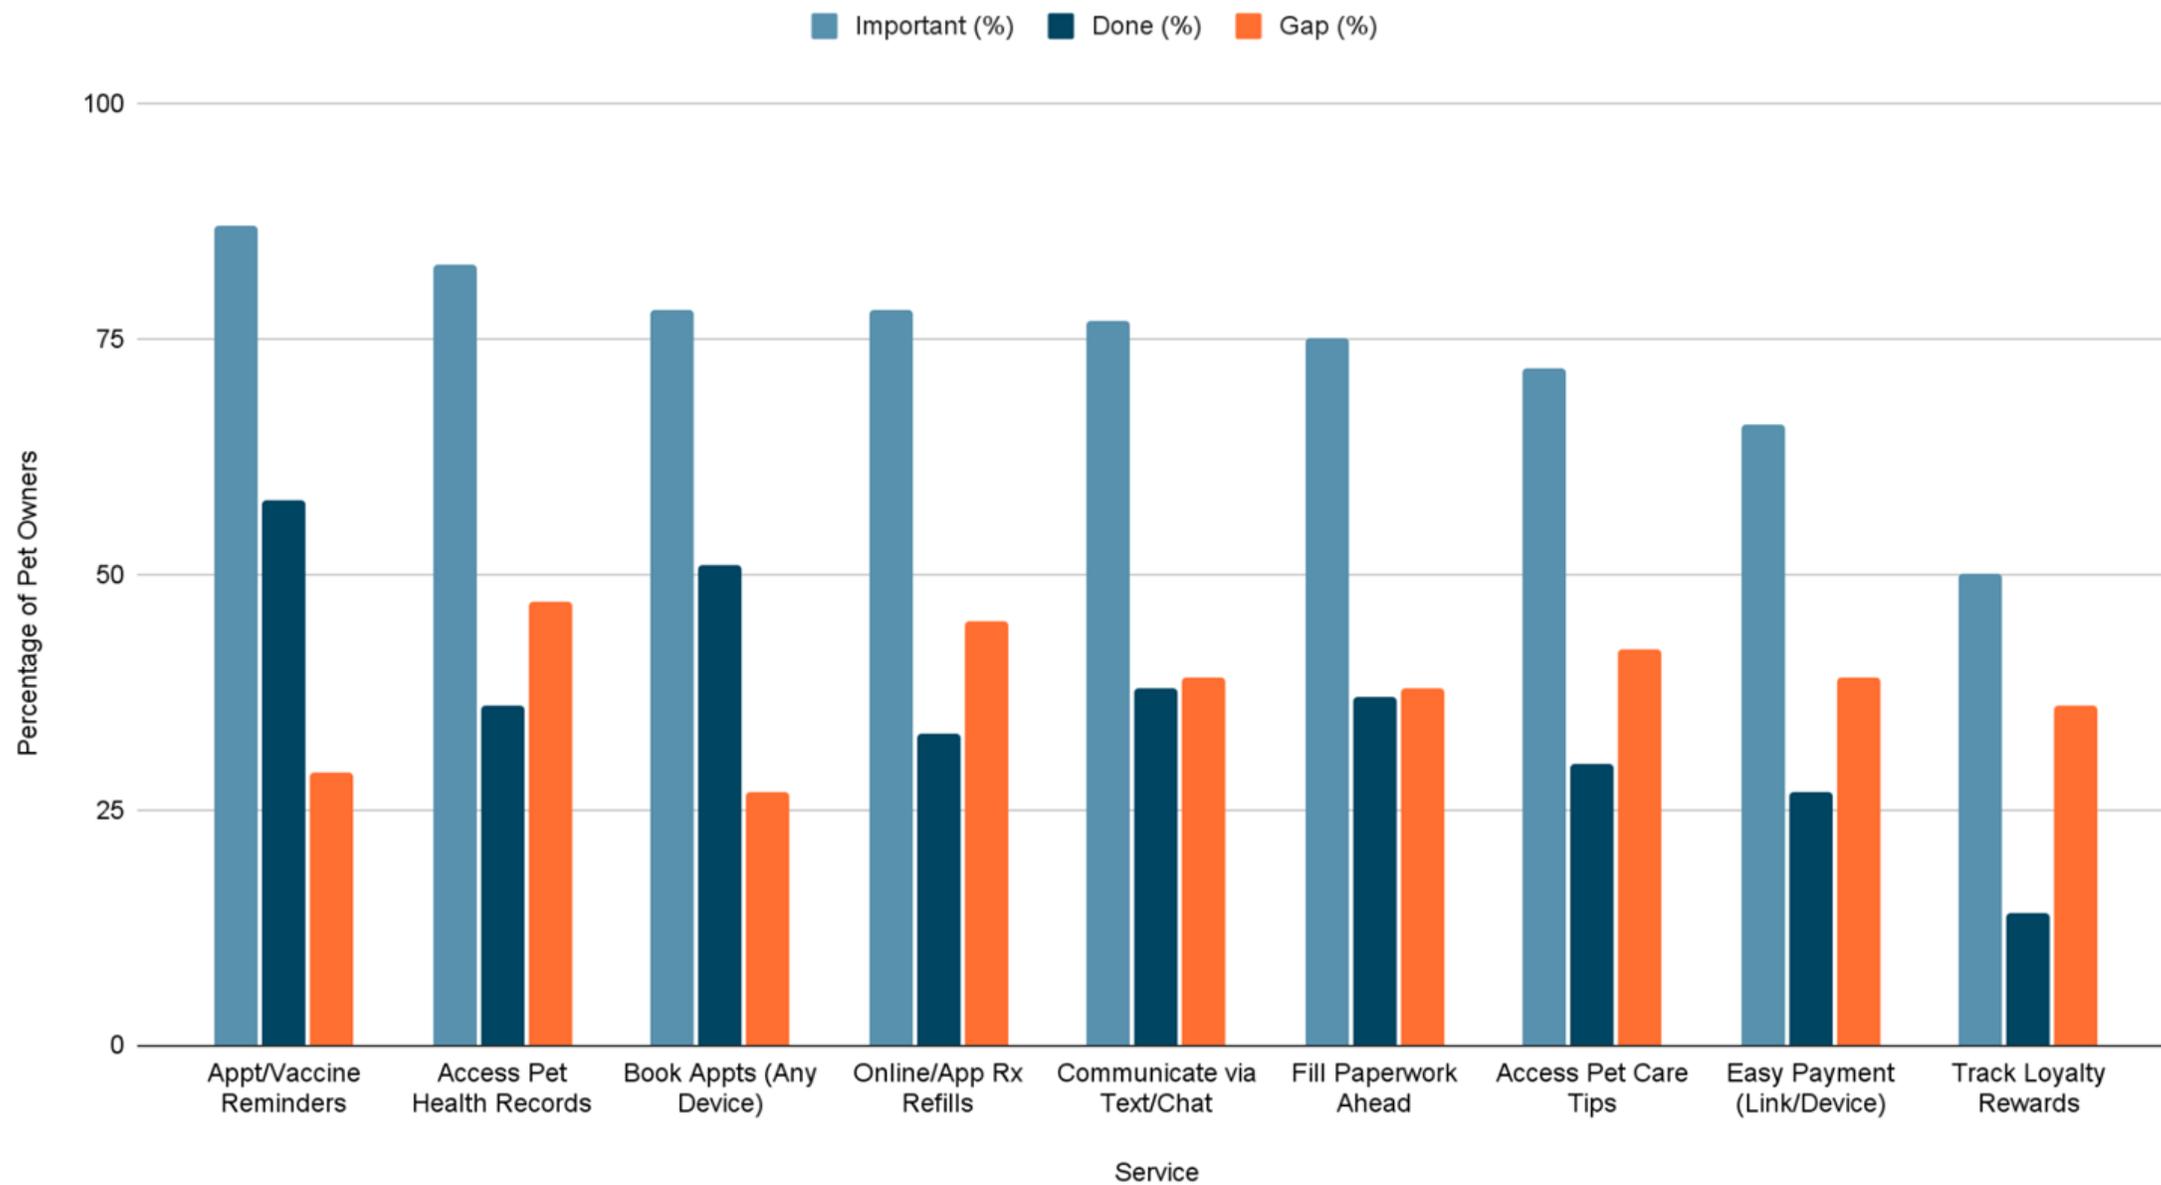

Tips

1. The pace of improvement necessitates continuous learning and revisiting past limitations (have prompts that you try each new release on to see if there is progress)
2. Expand the surface area of what you are using AI for (thought partner vs alternative to Google searching)
3. Try multiple LLMs, try paid tiers. Different models are good at different things. Free versions offer reduced functionality and intelligence

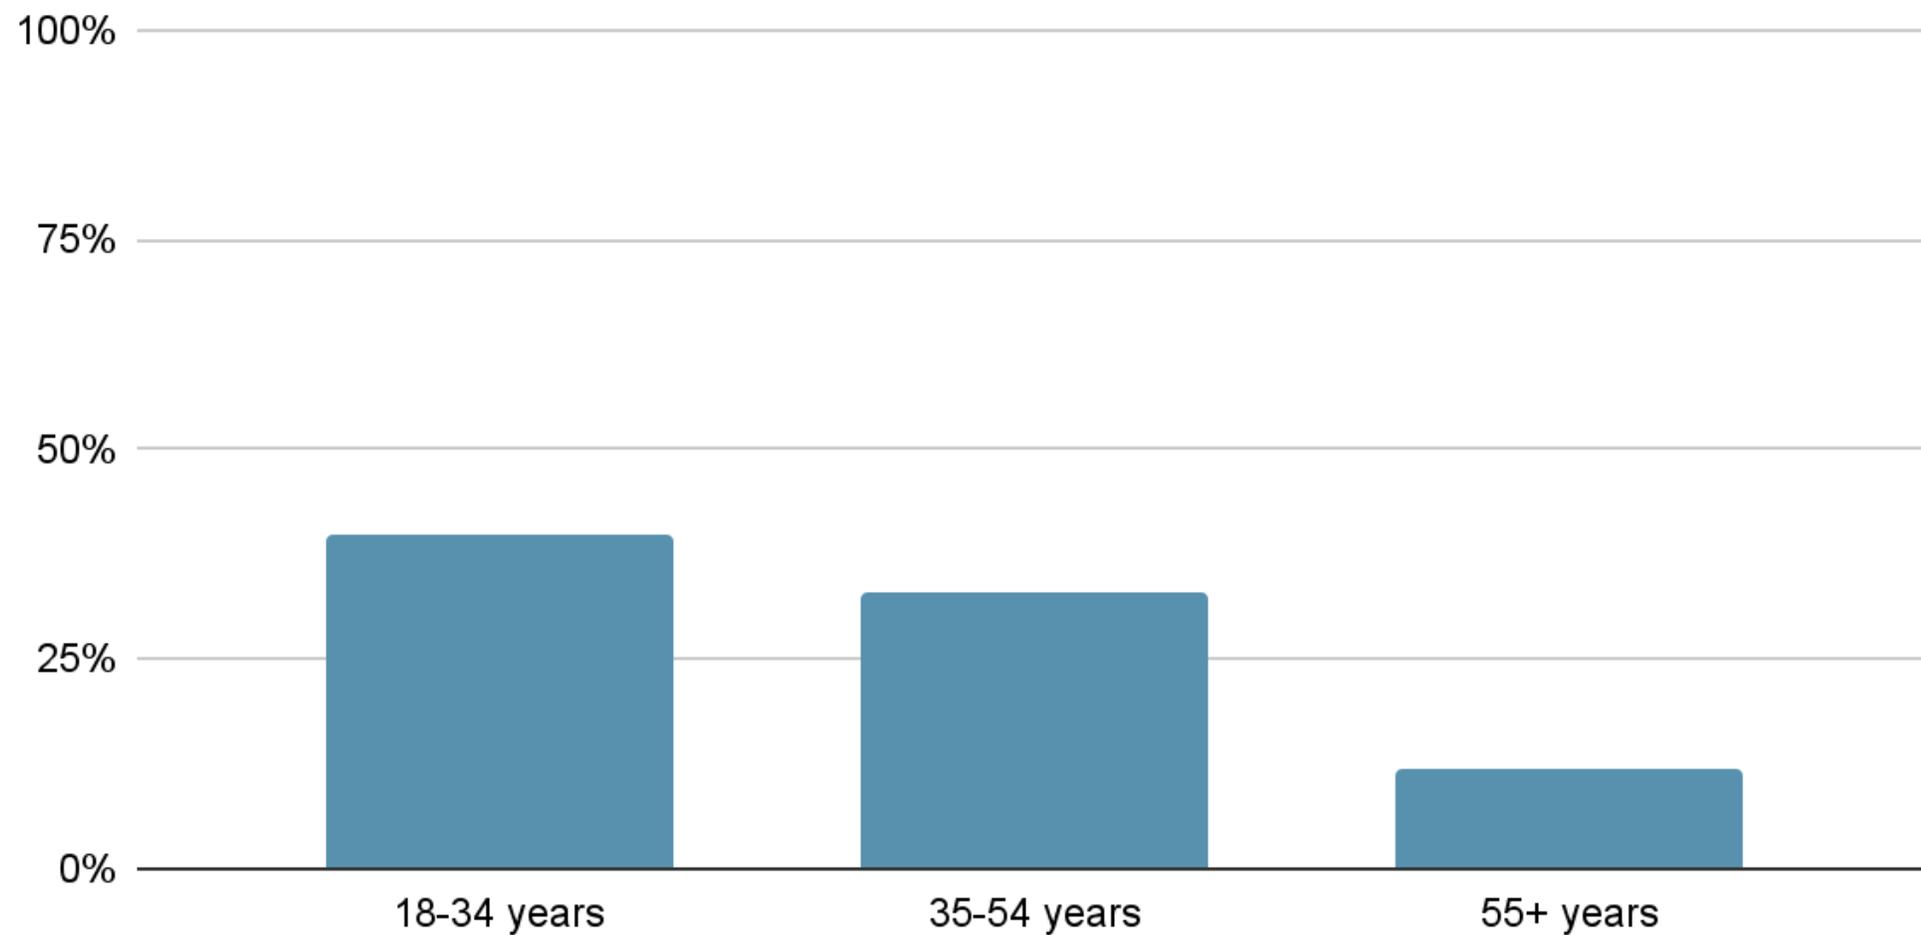

Today's clients have higher expectations
than ever before.
Technology is how we meet the moment.

The "Experience Gap"

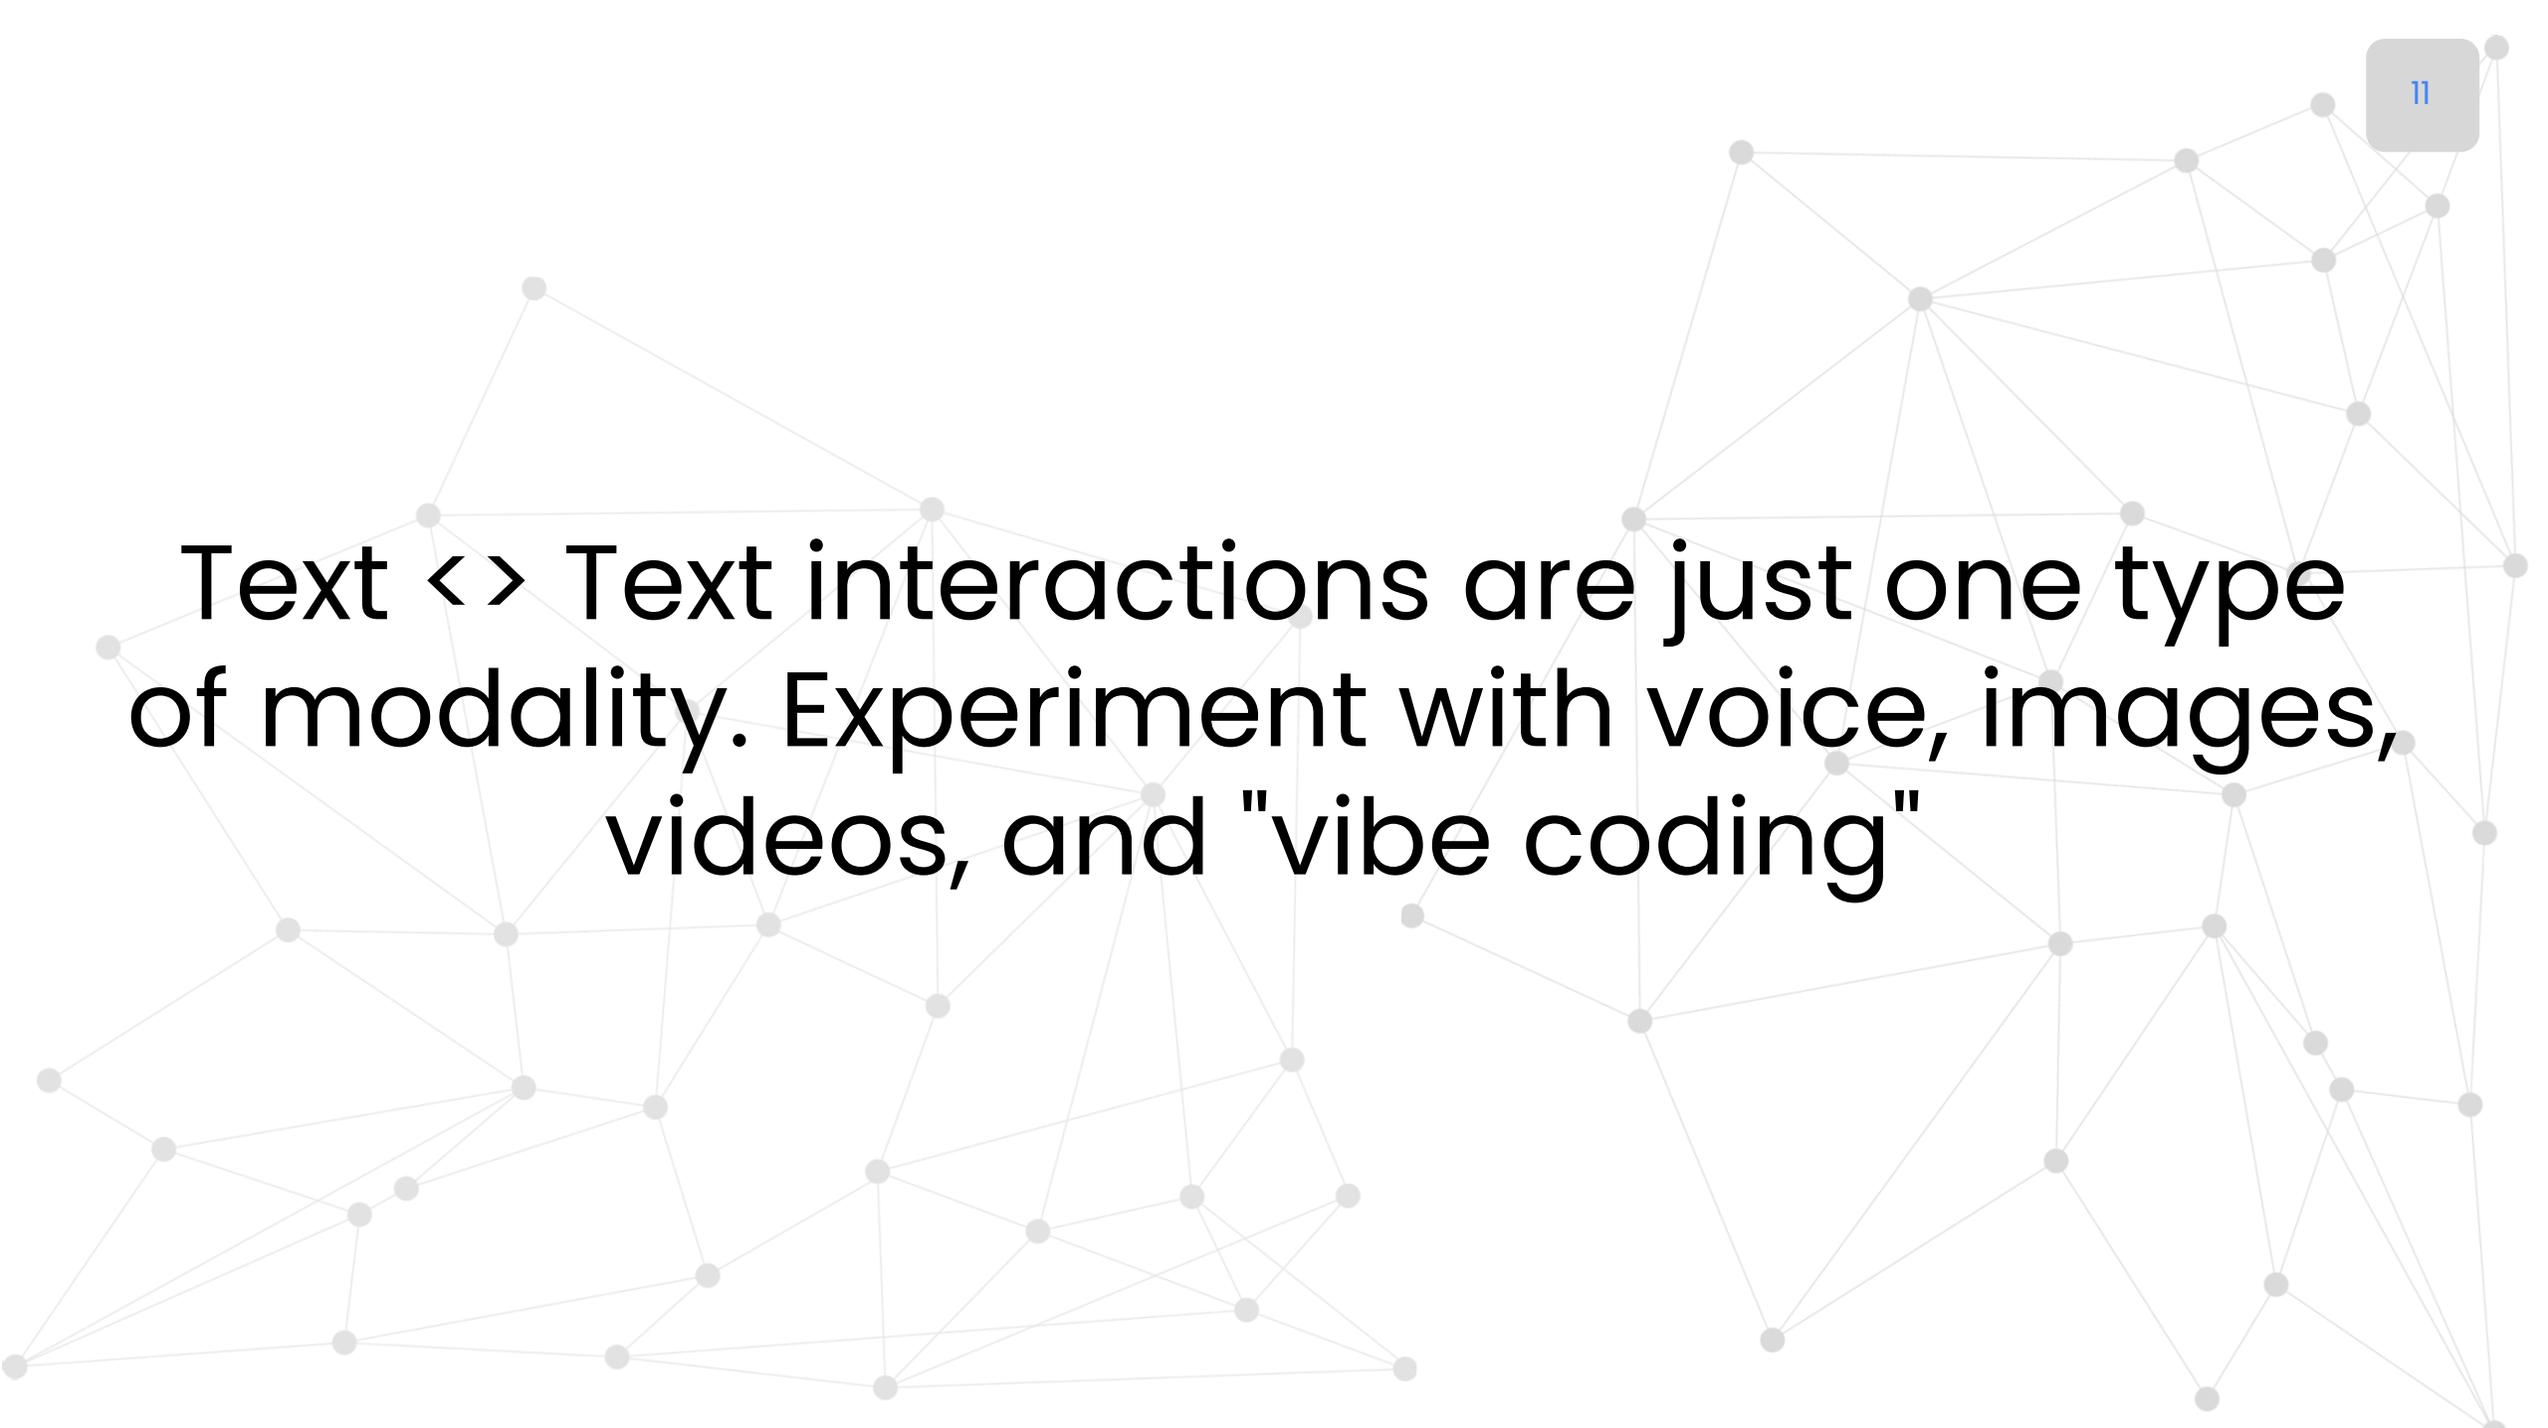

Likelihood of Changing Vets

Pet parents under 35 are more than 3x as likely to change their vet compared to those 55

Tips

1. Go through your own workflows end to end. What does it look like to book an appointment? How long does take? What are the points of friction?
2. Ensure you are measuring the steps at each point in the journey so you can see drop-offs between steps/actions?
3. Over-communicate preferred option to clients instead of them trying to determine who your practice operates (same with your staff!)
4. Be sensitive to conflicting communications or redundant tools (no one wants the same reminder from 3 different phone numbers in the same day)

Text <> Text interactions are just one type of modality. Experiment with voice, images, videos, and "vibe coding"

A stained glass picture of a robot in a library with a raven on her shoulder with a key in its mouth

An oil painting of a robot in a factory looking at a cat wearing a top hat

Today

"A stained glass picture of a woman in a library with a raven on her shoulder with a key in its mouth"

"An oil painting of a man in a factory looking at a cat wearing a top hat"

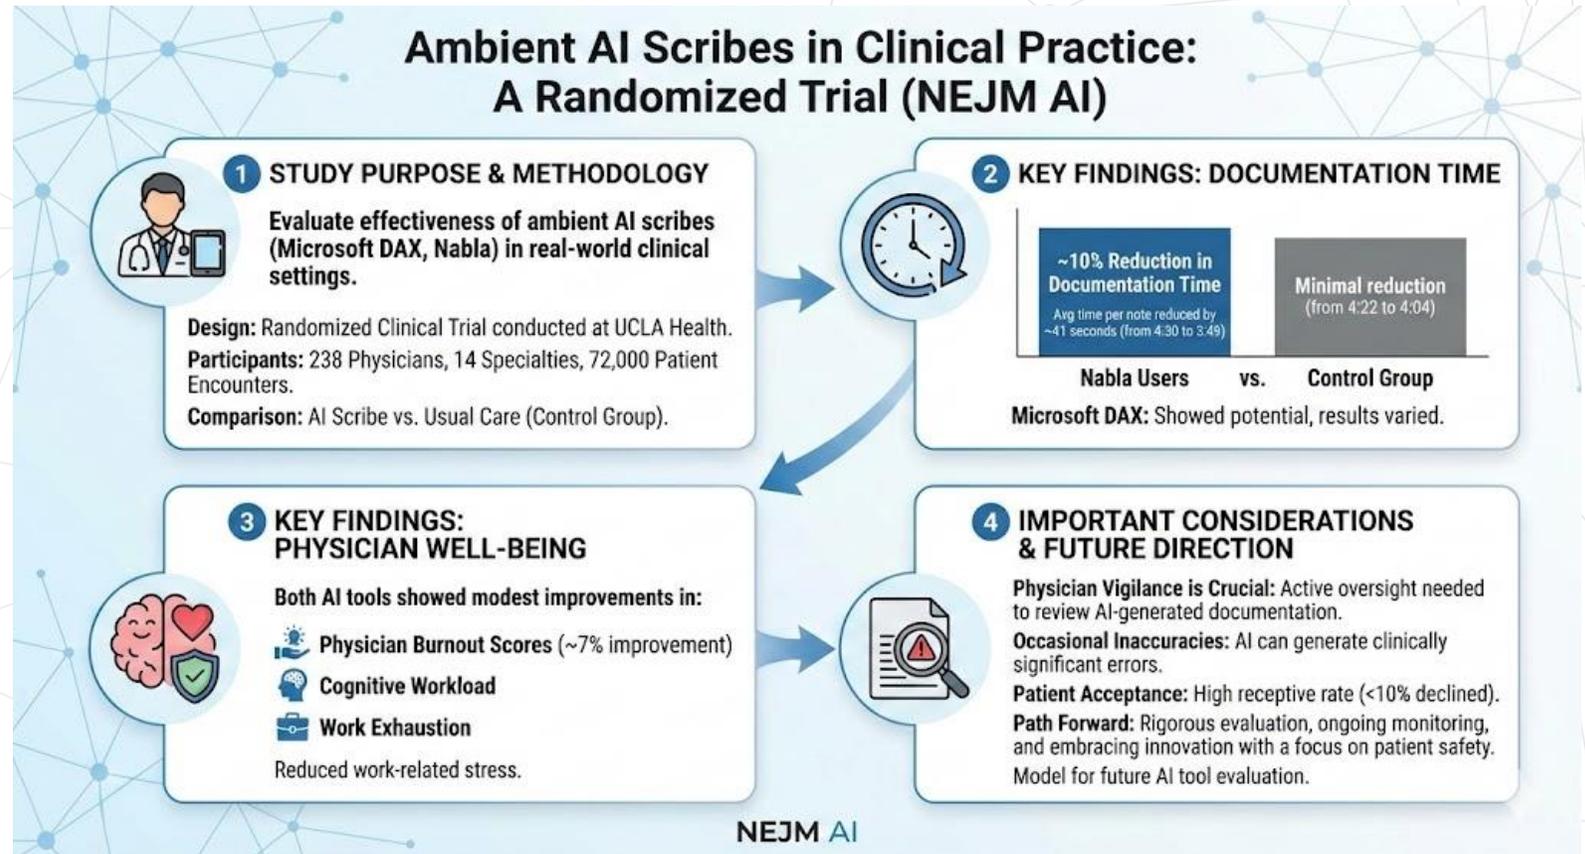

Prompt

Create a explainer info graphic based on this paper, highlighting the key findings

<https://ai.nejm.org/doi/full/10.1056/Aloa2501000>

Tool

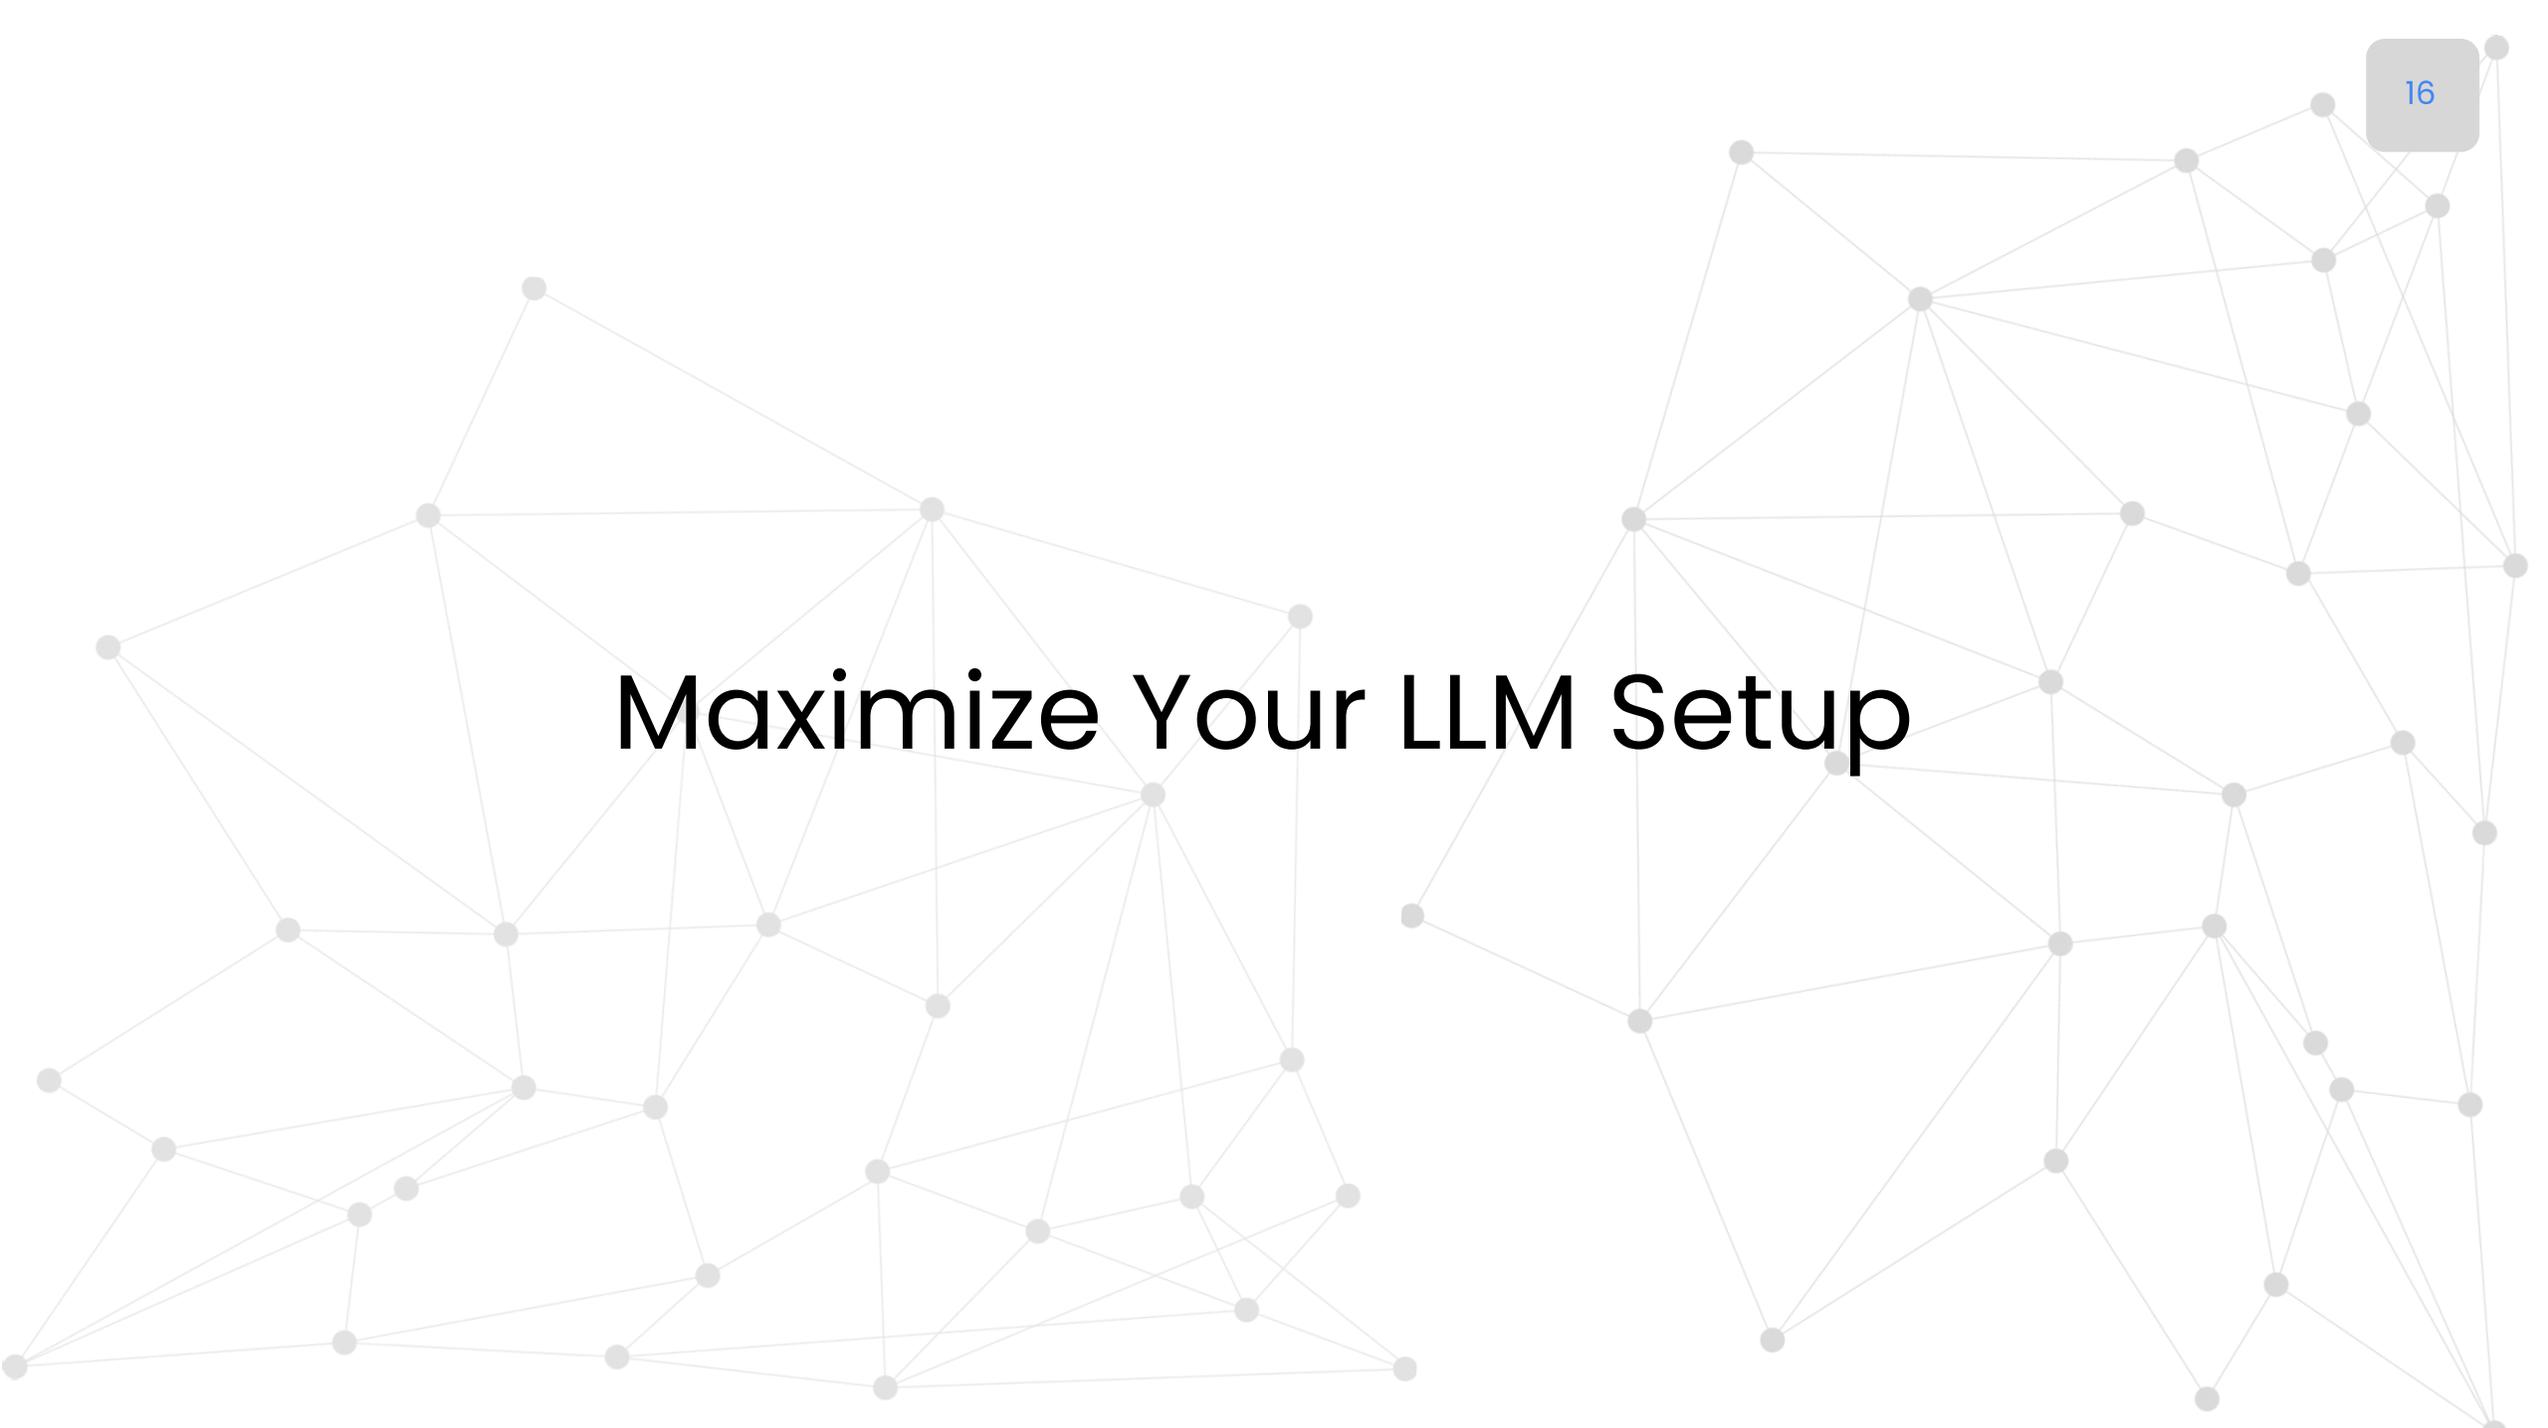

Nano Banana Pro (Google)

Tips

1. Image generation has gone from unusable to excellent in <2 years
2. Use it to help create slide images, infographics, and other visualizations for staff and for clients
3. Experiment with different levels of detail (Explain the flea life cycle at a grade 3 level)
4. Use in low stakes environments to gain confidence and trust
5. Leverage publicly available guides to improve image prompts and move behind the more standard “AI” image look/feel (eg. NanoBanana prompt techniques)
6. Leverage images to help explain back your own thinking/words/materials to help you understand what you are reading/creating

Maximize Your LLM Setup

Custom Instructions

Tailor ChatGPT to your needs

Personality

Shape the way ChatGPT responds

Memories

Remember key facts about you

Projects

Stay organized and focused

Explore Your Setup

1. Ask ChatGPT “what do you know about me” to understand the scope of its current memory. Add memories as you go along.
2. Adjust custom instructions to fit your specific needs (eg. show citations, don't use em-dashes)
3. Tailor the outputs to be more professional or friendly/informal.
4. Leverage projects to have contained conversation threads about a particular topic. Include files/content that can be referenced.

The image shows a dark-themed settings menu for ChatGPT. On the left is a sidebar with navigation options: General, Notifications, Personalization (highlighted), Apps, Schedules, Data controls, Security, Parental controls, and Account. The main area is titled 'Personalization' and contains several sections: 'Base style and tone' (set to 'Friendly'), 'Characteristics' (with options for Warm, Enthusiastic, Headers & Lists, and Emoji, all set to 'Default'), and 'Custom instructions' (a text box containing specific prompts like 'Be highly organized' and 'Suggest solutions that I didn't think about'). At the bottom, the 'About you' section is partially visible.

**Adam to show

identical prompt**

1. Maximizing AI Scribes

Evidence

AI scribes reduce documentation burden and save clinician time.

Real-world health systems reported thousands of hours saved across millions of patient encounters when using ambient AI scribes for clinical notes. [American Medical Association](#)

AI scribes improve workflow efficiency and clinician satisfaction.

Clinicians reported better focus on patients and less after-hours charting with AI documentation support. [Permanente Medicine](#)

Studies show AI documentation tools can decrease workload and improve documentation quality. Research highlights reductions in documentation time and increased clinician engagement when AI tools structure and summarize notes. [PMC](#)

Date/Time	Comments
01-14-2025 5:54:06pm	Zurie appears slightly lethargic, with a body condition score of 4/9. There are signs of mild dehydration, including tacky mucous membranes and slight skin tenting. The oral cavity appears normal, with no foreign objects and only mild halitosis. Upon abdominal palpation, the dog's abdomen is soft but mildly tense, and it shows mild discomfort in the cranial area. The heart rate and rhythm normal, and lung sounds are clear. A rectal exam reveals no abnormalities, with no evidence of melena or fresh blood. The dog's temperature is slightly elevated at 102.8°F, and there are no ectoparasites or dermatological abnormalities.

[New recording](#)

[Generate notes](#)

Use Client-Friendly Language to Improve Perception of Value

Rephrase technical terms into simple language during your examination.

Instead of **“palpation of the abdomen,”** you might say, **“I’m feeling for any unusual areas in the stomach region.”**

Narrate the Exam Flow as You Go

For example, saying, **“Next, I’m going to check Bella’s heart rate and breathing to ensure everything sounds clear,”** gives the AI context clues for each SOAP section while reassuring the client.

Emphasize Findings Clearly

When dictating findings, such as **“normal,” “mild,” or “severe,”** emphasize them so the AI correctly interprets the assessment, and the client can follow the exam’s progress.

Use Client-Friendly Language to Improve Perception of Value

Verbally Summarize Key Points

Summarize findings after each section (e.g., examination, diagnostic tests). This structured summary can lead to more accurate SOAP notes and keeps clients well-informed.

Engage the Client with Open Statements

By saying things like, **“Let’s see what Bella’s ears look like,”** you engage the client while giving the AI clarity on which exam portion you’re addressing, enhancing SOAP note structure.

Use Consistent Phrasing for Exam Findings

The AI learns better with repeated, structured phrasing.

2. ChatGPT Hacks for Smarter Practice Management

Evidence

Health providers see AI as promising for efficiency and reduced administrative work. Surveys of healthcare professionals indicate AI is viewed as helpful in cutting workflow burden. [Cureus](#)

The best evidence is **you.**

How to Craft the Perfect Prompt for Business Writing Assignments

01

02

03

Be Specific About the Context

- Share the **industry focus** (e.g., veterinary medicine, client communication, practice management).
- Include details like the **intended audience** (veterinarians, technicians, pet owners, CSR teams) and **goal** (education, engagement, driving conversions).

Example

"Write a social media post to educate pet owners about the benefits of regular dental cleanings, making it friendly and engaging."

Generate

How to Craft the Perfect Prompt for Business Writing Assignments

01

02

03

Clearly Define the Output Format

- Indicate whether you need a blog post, a social media caption, an email draft, talking points, or visuals.
- Mention any **word count limits** or tone preferences.

Example

"Draft a 150-word email to pet owners about an upcoming discounted dental clinic, using a warm and encouraging tone."

Generate

How to Craft the Perfect Prompt for Business Writing Assignments

01

02

03

Collaborate

- Let me know if you'd like revisions or if something isn't exactly right.
- **Feedback** helps fine-tune the result.

Example

"This is close, but can you add more emphasis on how this improves the client experience?"

Eric a technician can only work Monday through Friday from 8 am to 1 pm and Saturday he can't work.

Sally a technician can only work Tuesday's at 2 pm until 5 pm.

Mary a technician can only work Friday's from 8 to 5 pm.

Caitlin a technician can only work Wednesday's and Thursday's from 12 to 5 pm.

Can you build a schedule so we have a technician working every day from 8 to 5 pm. At least 1 technician. If it can't be done tell me where the gaps are.

Schedule Building Output

Let's analyze the availability and try to fill every day from **8 AM to 5 PM** with at least one technician:

Availability Recap:

- **Eric:** Monday to Friday, **8 AM - 1 PM** (Not available Saturdays).
- **Sally:** Tuesday, **2 PM - 5 PM**.
- **Mary:** Friday, **8 AM - 5 PM**.
- **Caitlin:** Wednesday and Thursday, **12 PM - 5 PM**.

Day-by-Day Schedule:

Monday:

- **Eric:** **8 AM - 1 PM**
Gap: **1 PM - 5 PM** (No one available).

Tuesday:

- **Eric:** **8 AM - 1 PM**
- **Sally:** **2 PM - 5 PM**
Gap: **1 PM - 2 PM** (No one available).

Wednesday:

- **Eric:** **8 AM - 1 PM**
- **Caitlin:** **12 PM - 5 PM**
Overlap: **12 PM - 1 PM** (both work).
Coverage complete: **8 AM - 5 PM**.

Thursday:

- **Eric:** **8 AM - 1 PM**
- **Caitlin:** **12 PM - 5 PM**
Overlap: **12 PM - 1 PM** (both work).
Coverage complete: **8 AM - 5 PM**.

Friday:

- **Eric:** **8 AM - 1 PM**
- **Mary:** **8 AM - 5 PM**
Overlap: **8 AM - 1 PM** (both work).
Coverage complete: **8 AM - 5 PM**.

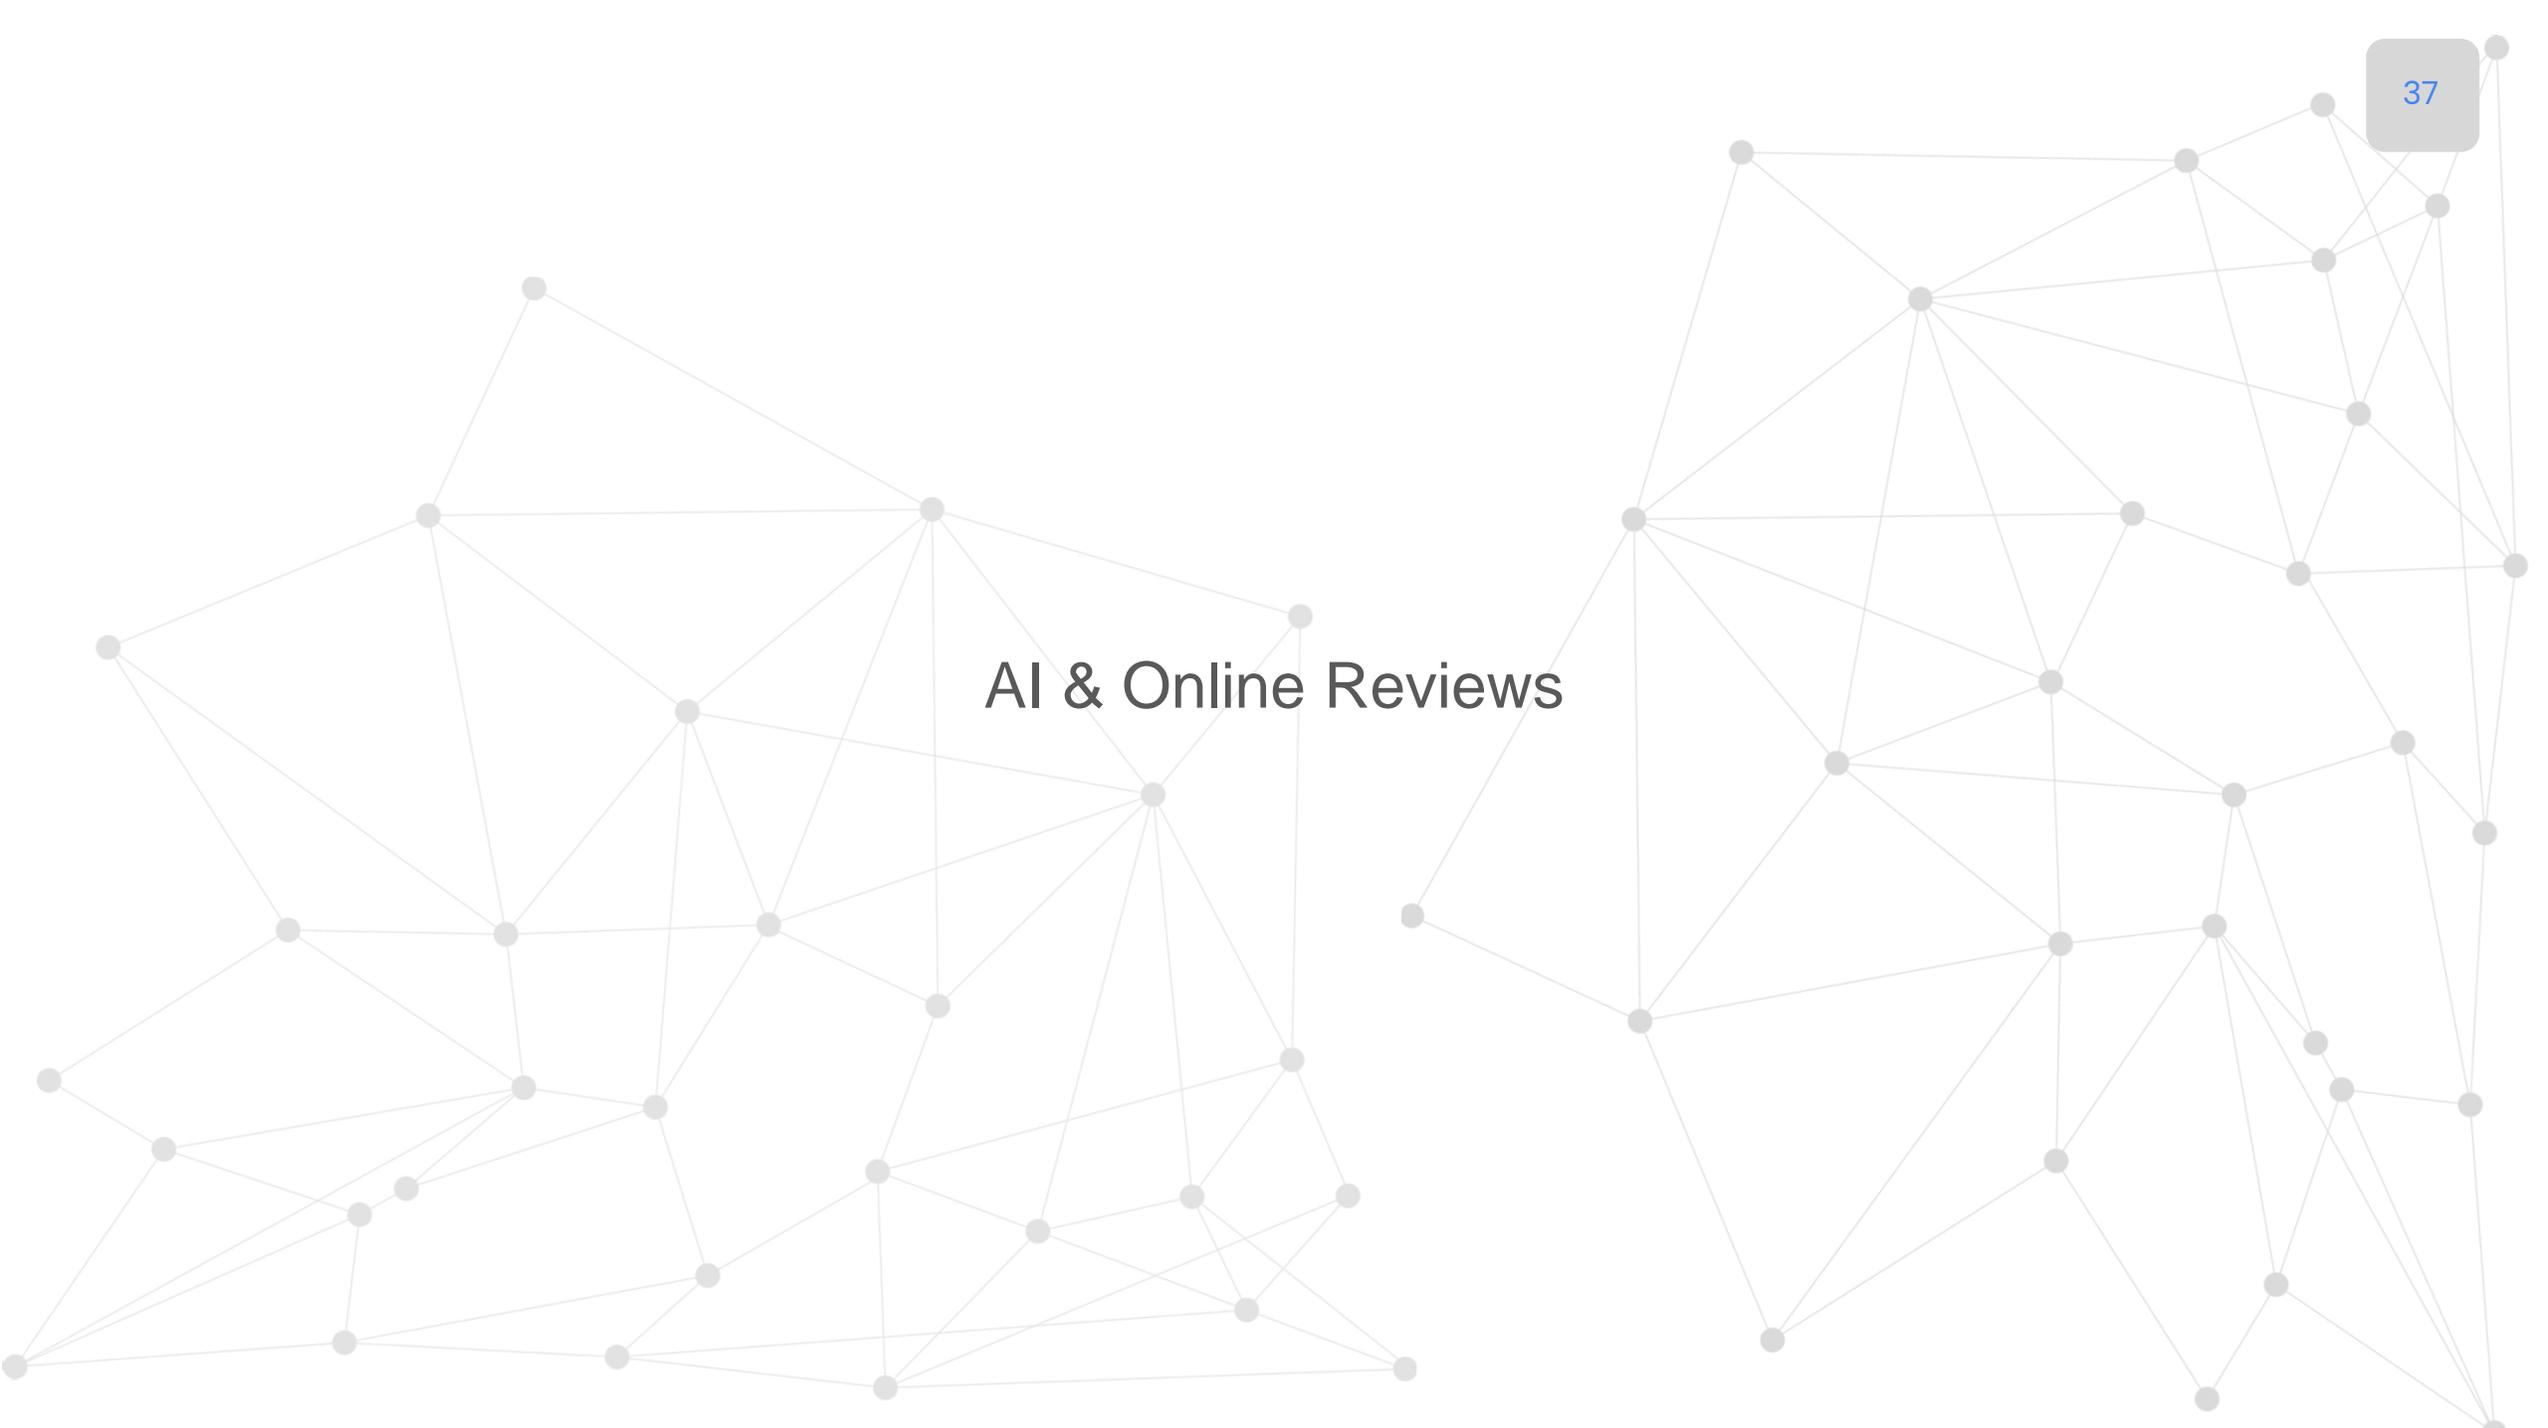

Saturday:

- **No one available. Full gap:** **8 AM - 5 PM**.

Summary of Gaps:

- **Monday:** **1 PM - 5 PM**.
- **Tuesday:** **1 PM - 2 PM**.
- **Saturday:** **8 AM - 5 PM** (no one available).

Would you like suggestions on adjusting the schedule or finding additional coverage?

The Impact of AI on Communication

UNITED 

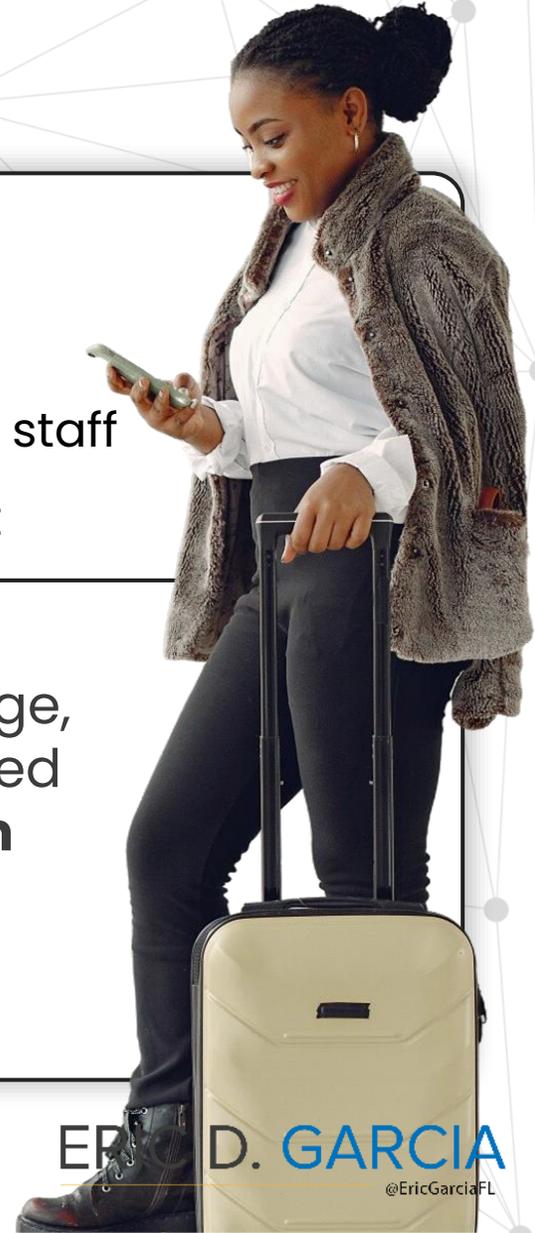

United replaced some human-staffed counters with kiosks + app guidance.

Surprisingly, their customer satisfaction scores WENT UP.

Why?

- ✔ Clear, proactive updates
- ✔ Reduced pressure on frontline staff
- ✔ Transparency that builds trust

“We’ve found that, on average, customers who use the United app on the day of travel **can save up to 30 minutes and report higher satisfaction than those who don’t**”

What If We Did This Instead?

3. Understand the strengths, limits, and a major legal risk most people overlook with AI

AI Policy for Veterinary Hospitals

Scope

Data Security

Training

Client Consent

Accountability

Continuous Monitoring

Ethics

Reporting

Accountability

Define who is responsible for AI-driven decisions and ensure that human oversight is always part of the process.

The policy should clarify that **veterinary professionals are accountable for final decisions**, even when AI tools are involved, and outline the procedure for reviewing AI recommendations.

A doctor in a white coat and blue gloves is looking at a tablet. The background is dark with a network overlay of white dots and lines. The text is in large, bold, yellow letters.

FAITHFULNESS HALLUCINATION DETECTION IN HEALTHCARE AI

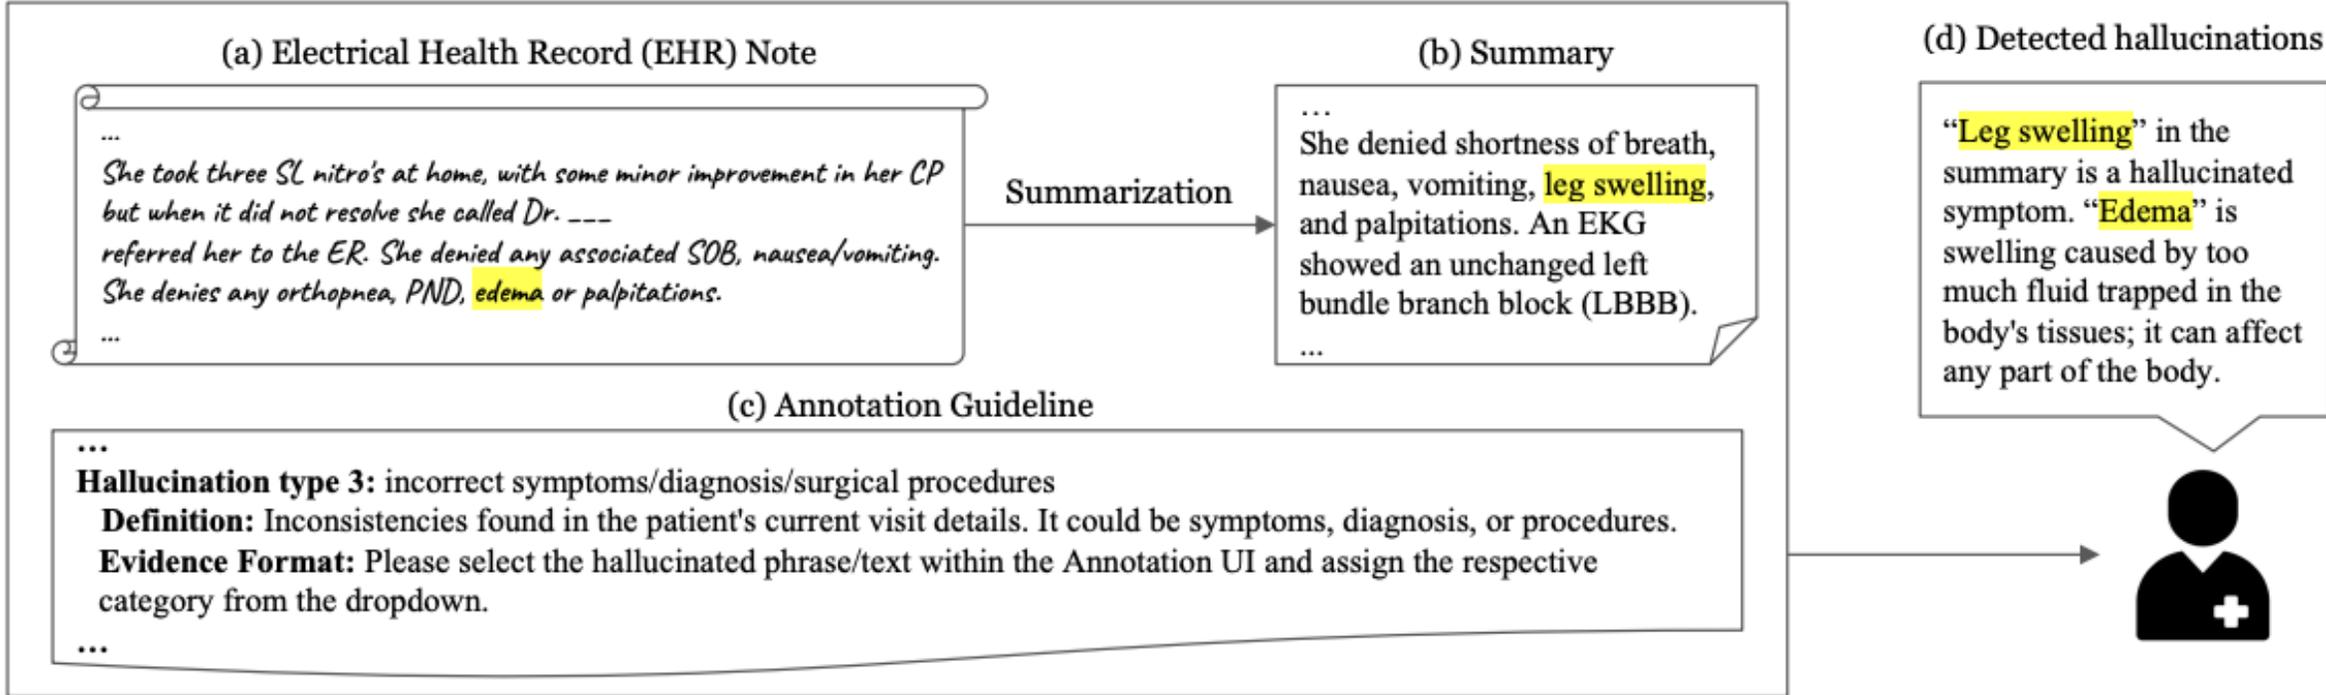

THE CEO OF CHATGPT IS SURPRISED THAT PEOPLE TRUST IT

♡ 6,699 🔖

🌐 Liked by jole24 and others

pubity On the first episode of OpenAI's new podcast, CEO Sam Altman addressed something most people overlook, our growing trust in AI tools like ChatGPT.

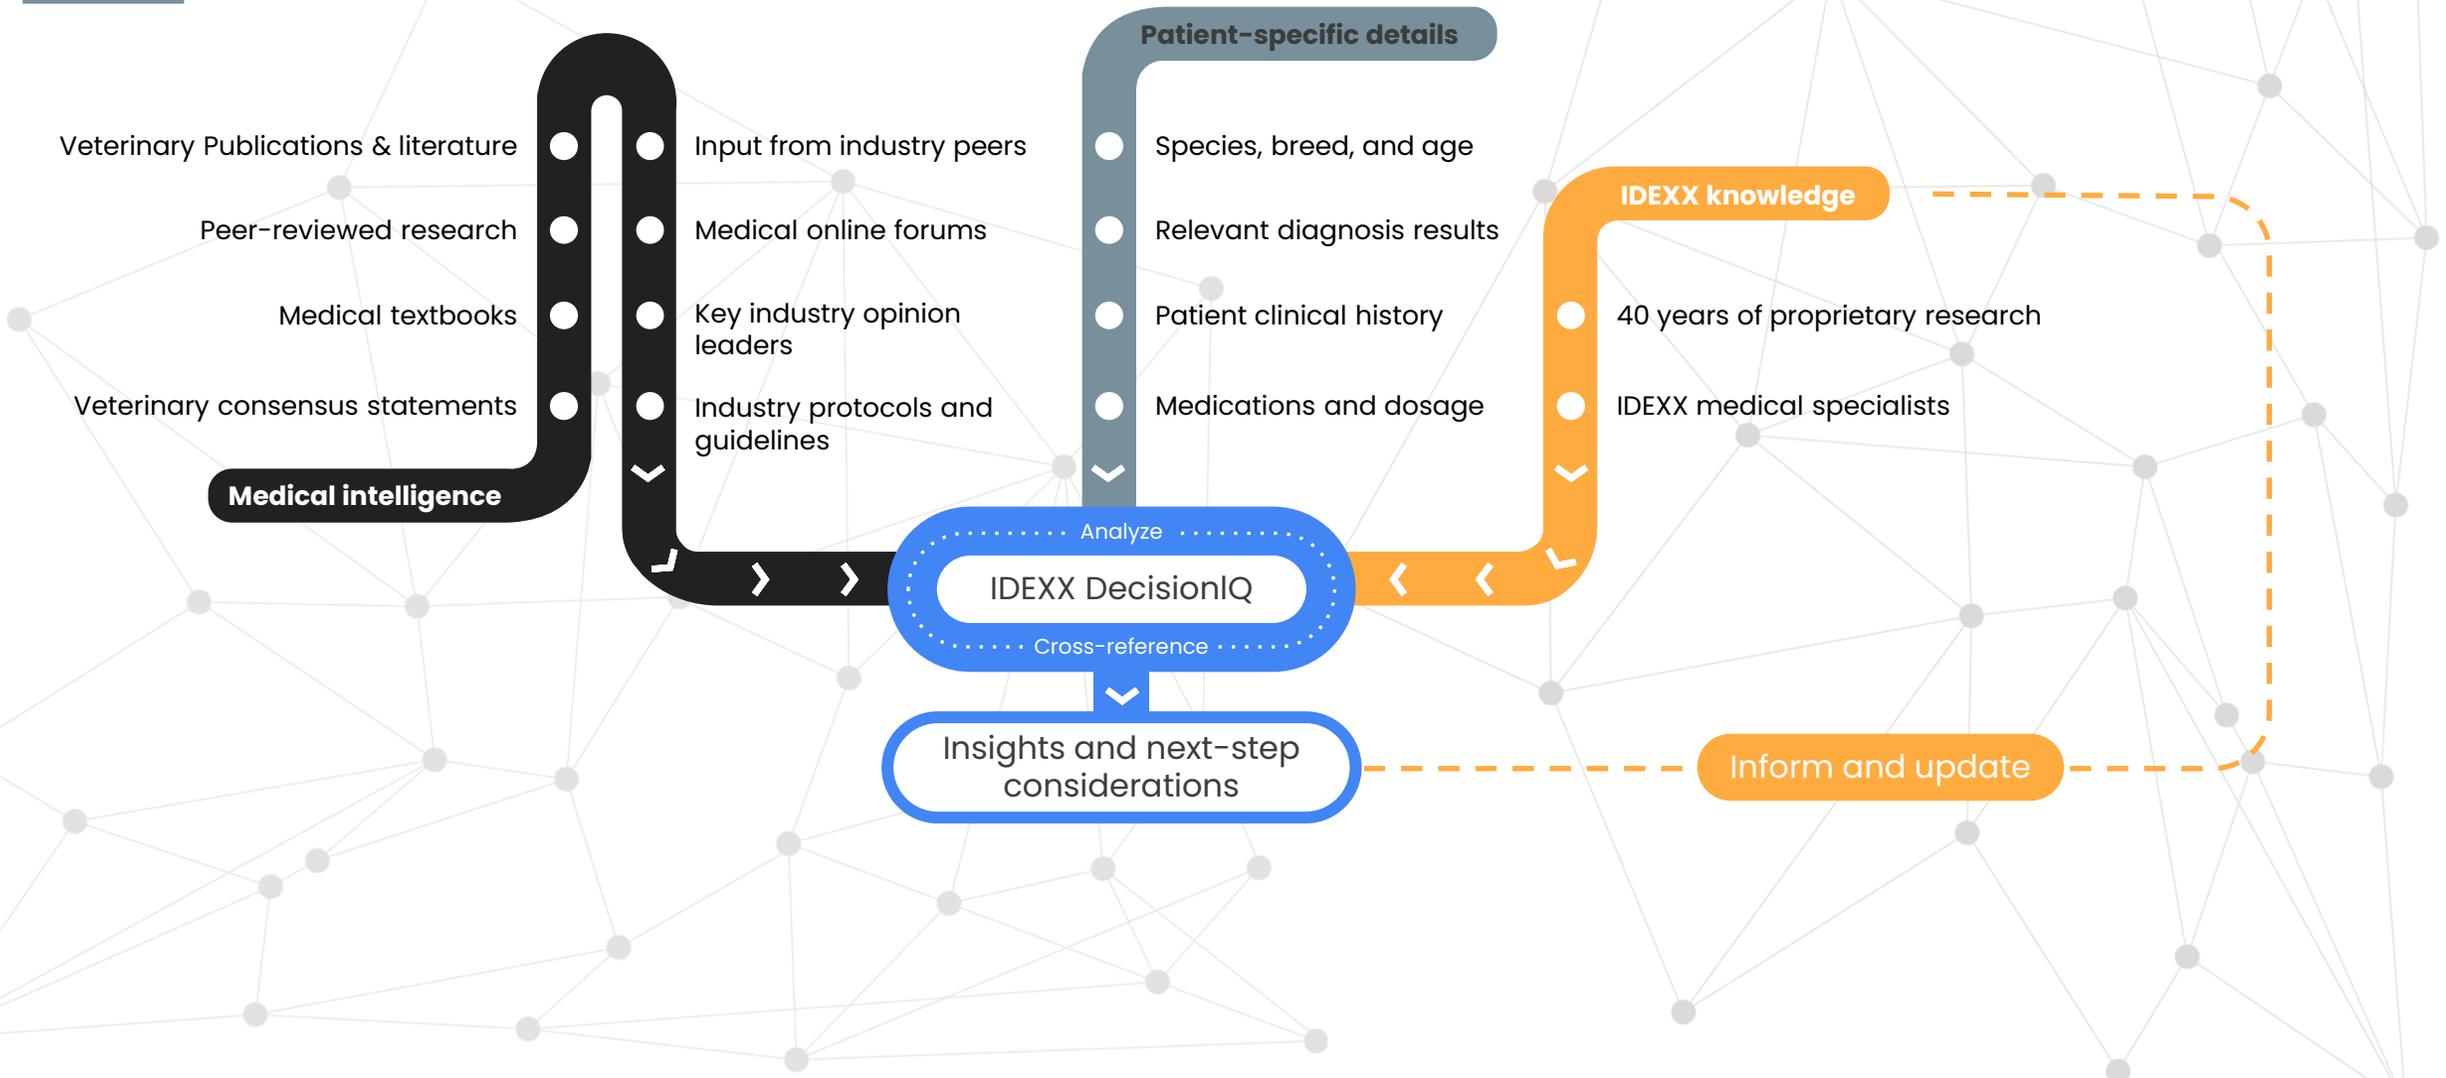

"People have a very high degree of trust in ChatGPT, which is interesting, because AI hallucinates," he said. "It should be the tech that you don't trust that much."

Faithfulness hallucination in clinical note summaries refers to the phenomena where summarization models generate content that is **incorrect or too general** according to information in the source clinical notes.

Transparency

Client Consent

Develop protocols for obtaining informed consent from clients when AI tools are used in medical record keeping.

We're recording!

happydoc

HappyDoc helps your veterinarian translate your appointment into legally required medical records with ease...

Bella

Please let us know if you prefer that your veterinarian not use HappyDoc.

www.happydoc.ai

The policy should require that **clients are informed about AI's role** in their pet's care and give explicit consent for its use.

Legal Risk: Recording Without Consent

In all-party consent states, secretly recording a client in an exam room – even for an AI scribe – can be illegal

In some states, unauthorized recording may be charged as a felony under wiretap or eavesdropping laws

Medical or veterinary settings do not create an exception to recording consent laws

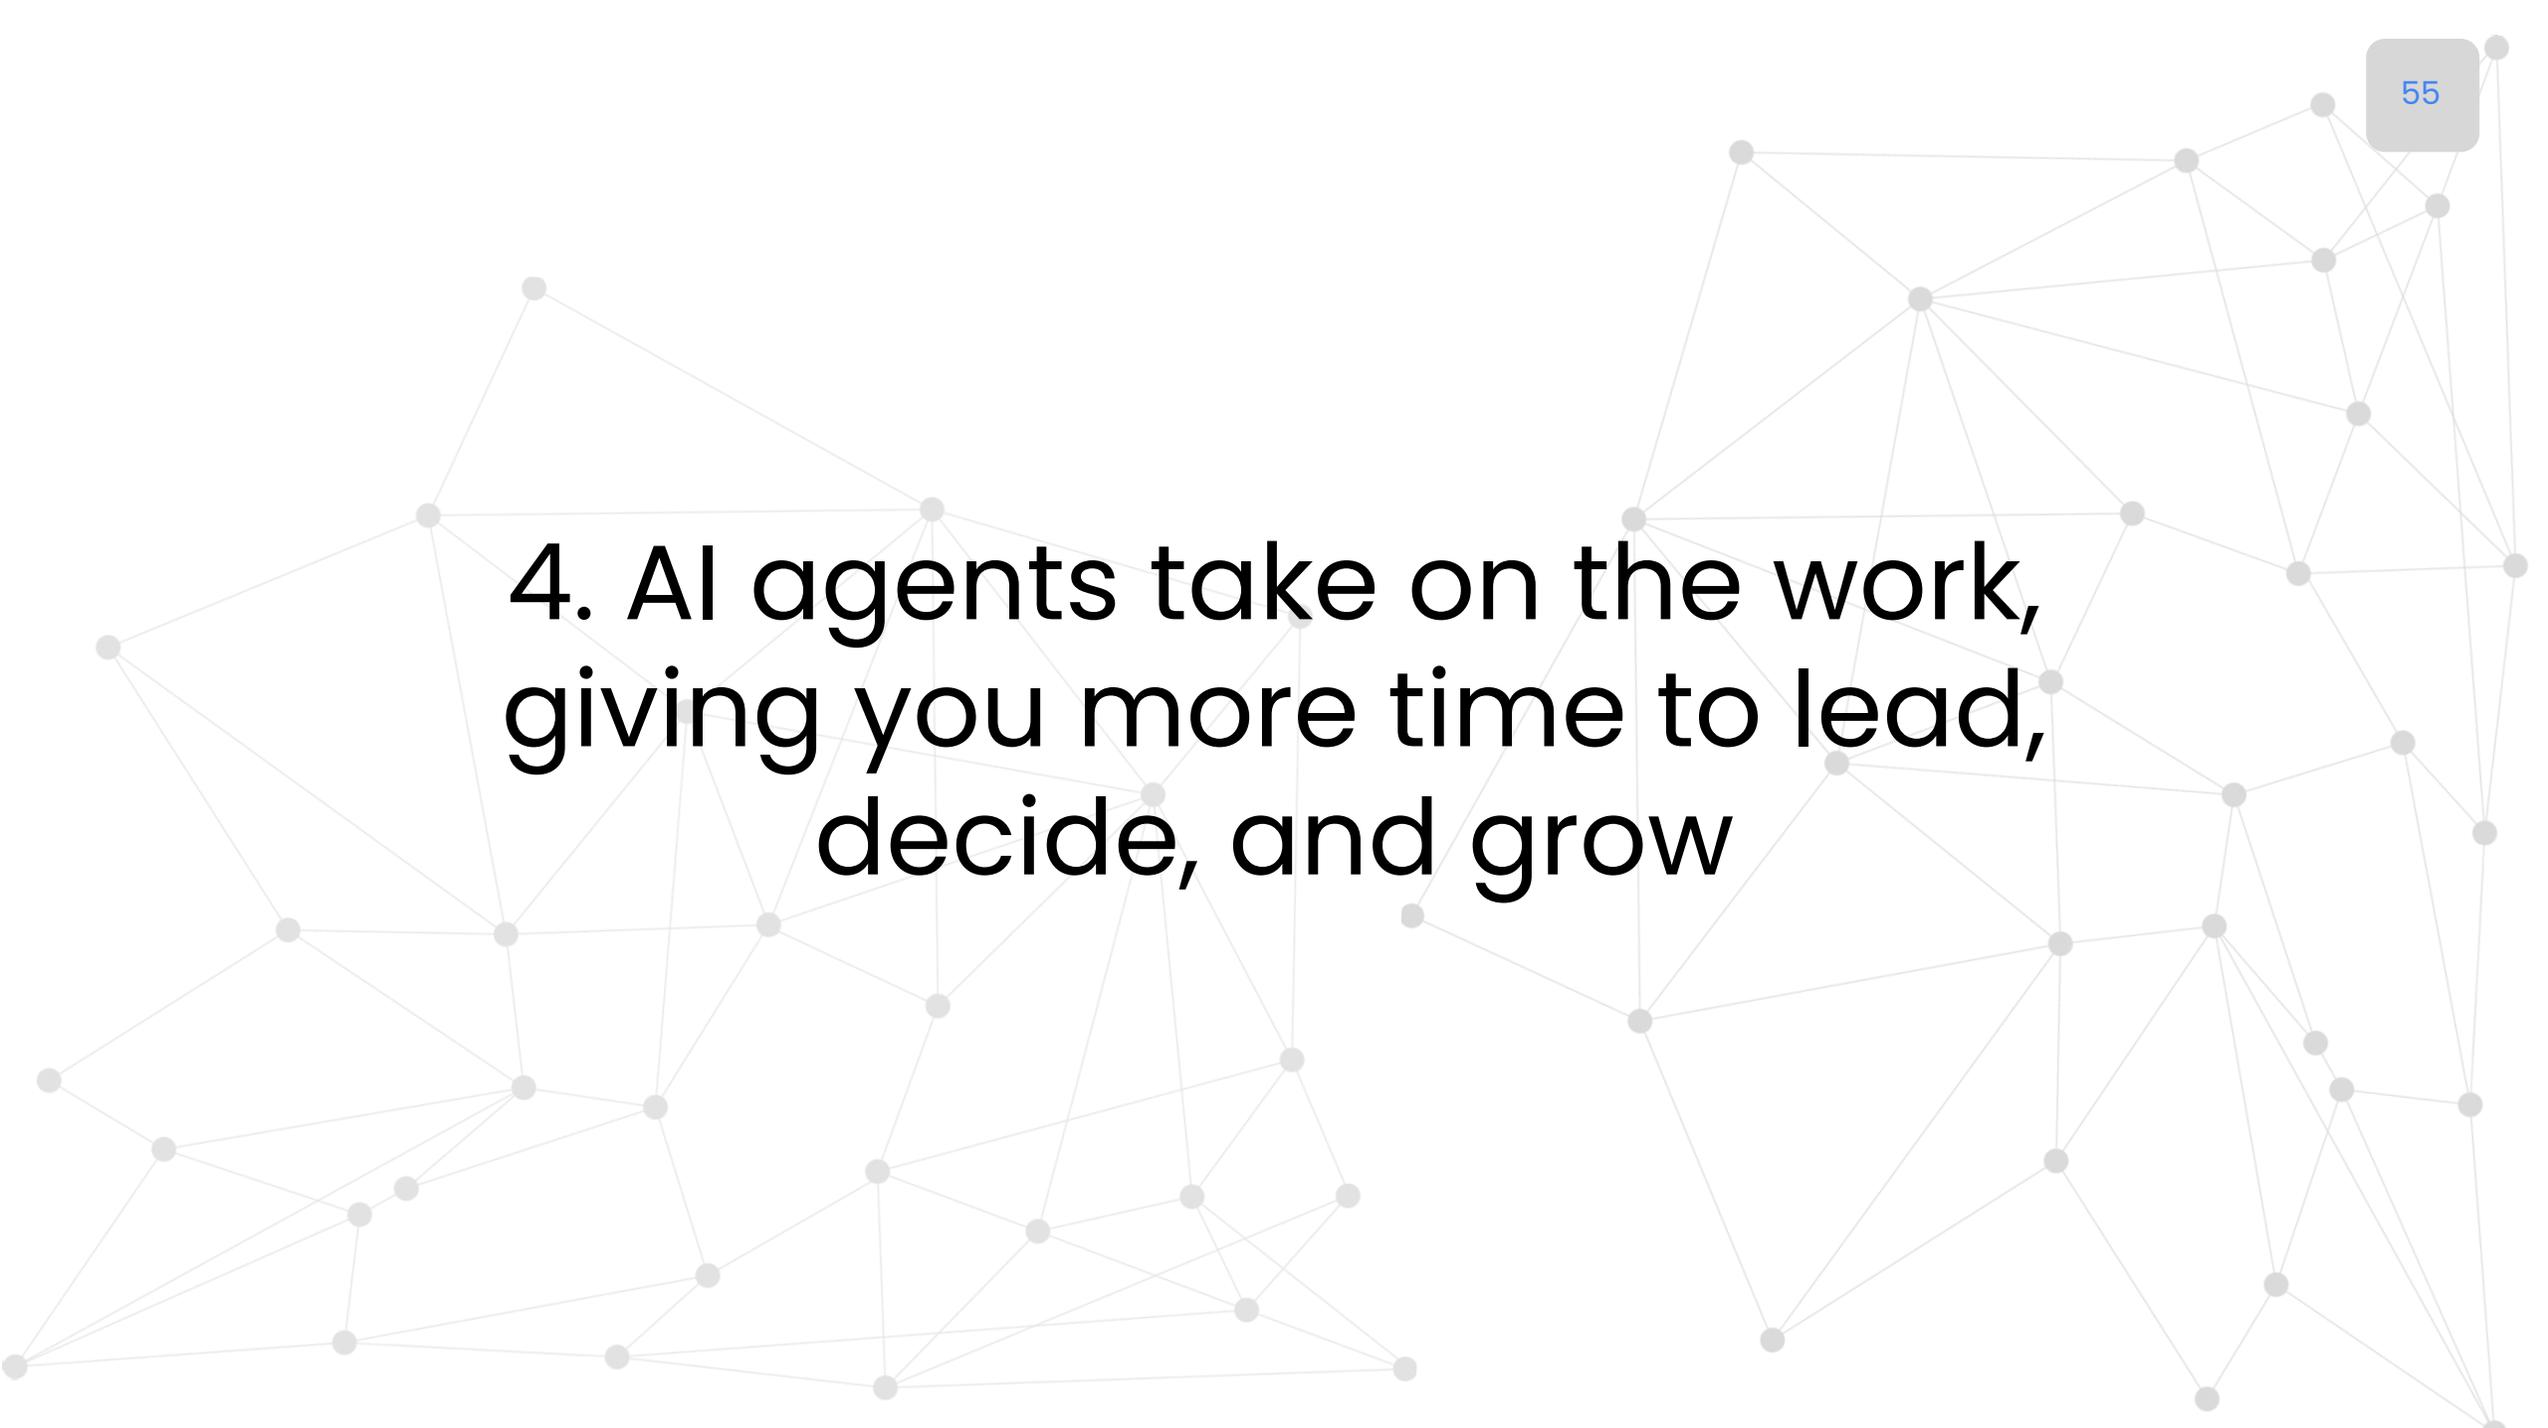

The risk is tied to lack of disclosure and consent, not the purpose of the recording

Reporting

Implement a procedure for reporting and **addressing any issues or errors related to AI use.**

The policy should include a protocol for logging incidents, investigating AI-related errors, and taking corrective measures.

4. AI agents take on the work,
giving you more time to lead,
decide, and grow

Evidence

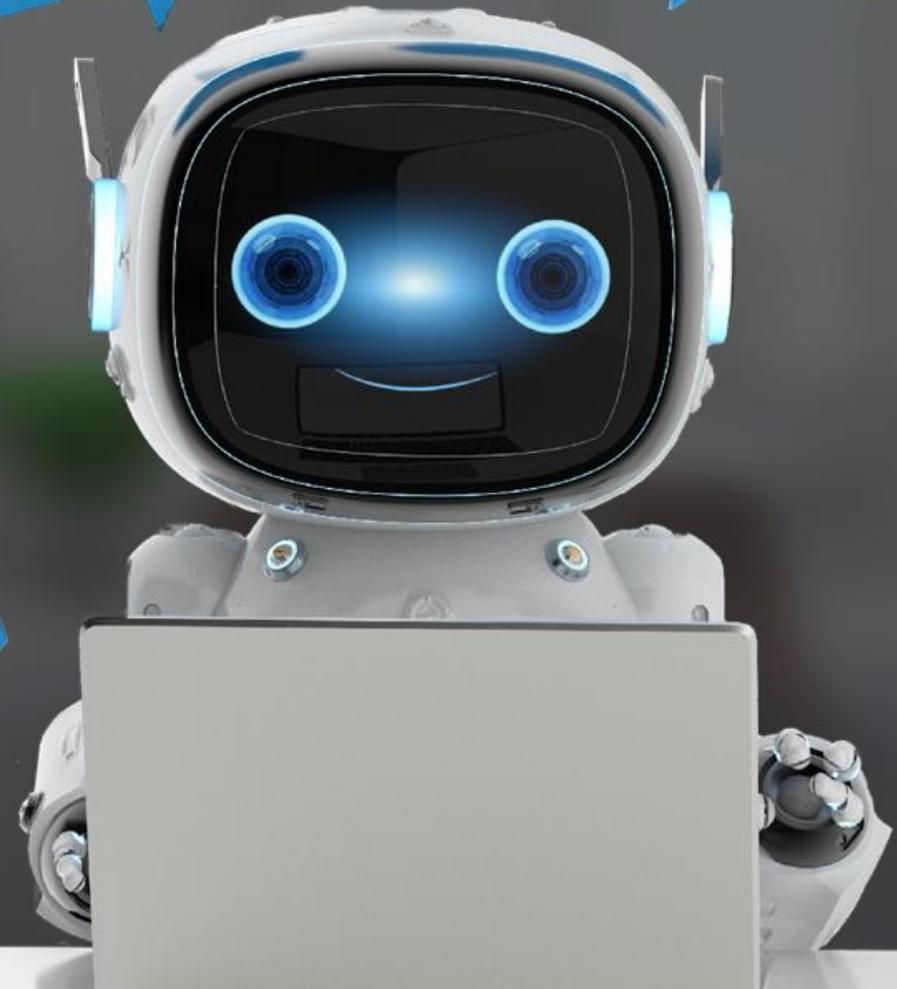

Agentic AI boosts efficiency and can take on high-volume, repetitive, or procedural work, allowing human workers to focus on higher-value tasks like strategy, customer engagement, and decision-making — essentially giving teams more time to lead and grow.

<https://aws.amazon.com/what-is/agentic-ai/>

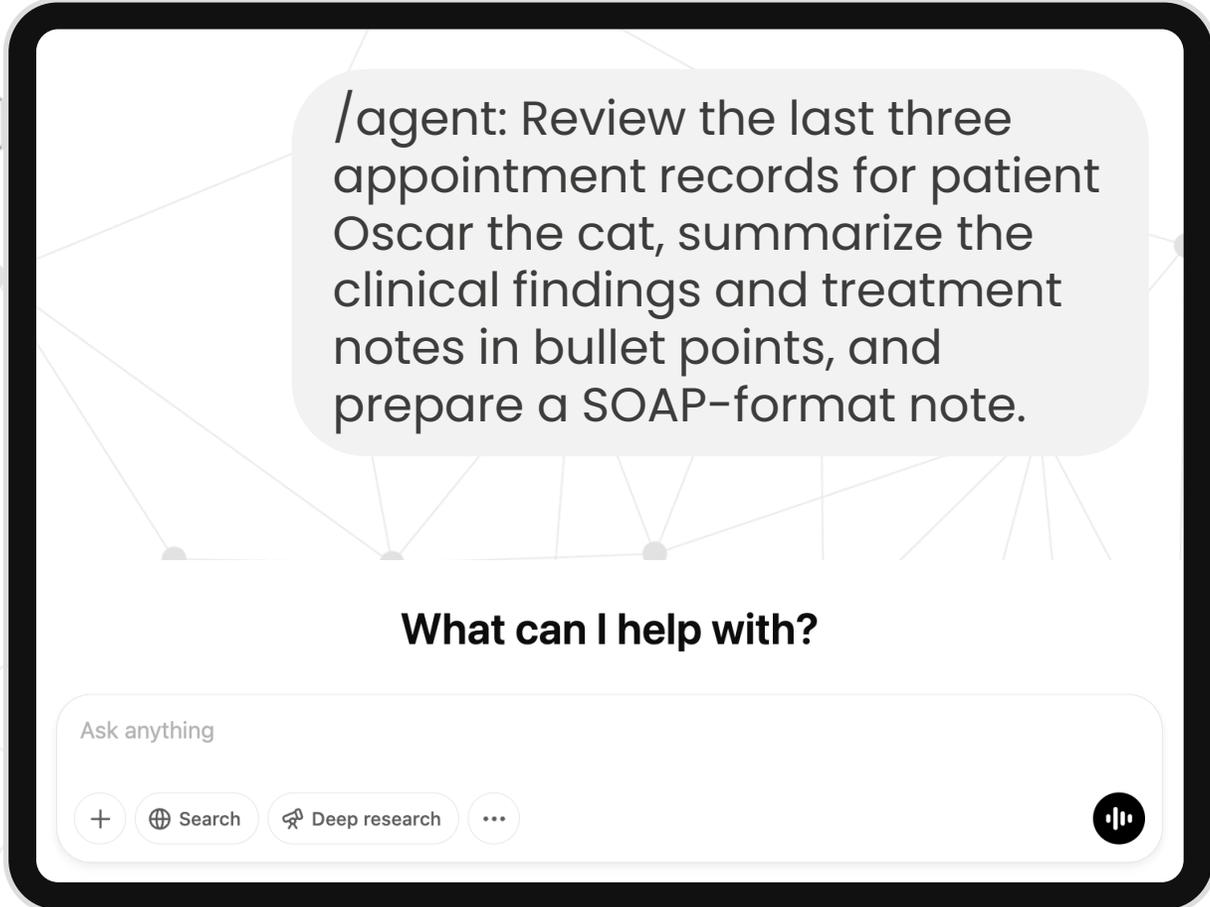

ChatGPT Agent Mode

Agent mode is chatgpt's
"hands-on" mode
It doesn't just give you ideas,

**It takes action on your
behalf in a controlled,
transparent way.**

High-Impact Use Cases: Streamlined Medical Summaries

/agent: Review the last three appointment records for patient Oscar the cat, summarize the clinical findings and treatment notes in bullet points, and prepare a SOAP-format note.

I've never felt this much behind as a programmer. The profession is being dramatically refactored as the bits contributed by the programmer are increasingly sparse and between. I have a sense that I could be 10X more powerful if I just properly string together what has become available over the last ~year and a failure to claim the boost feels decidedly like skill issue. There's a new programmable layer of abstraction to master (in addition to the usual layers below) involving agents, subagents, their prompts, contexts, memory, modes, permissions, tools, plugins, skills, hooks, MCP, LSP, slash commands, workflows, IDE integrations, and a need to build an all-encompassing mental model for strengths and pitfalls of fundamentally stochastic, fallible, unintelligible and changing entities suddenly intermingled with what used to be good old fashioned engineering. Clearly some powerful alien tool was handed around except it comes with no manual and everyone has to figure out how to hold it and operate it, while the resulting magnitude 9 earthquake is rocking the profession. Roll up your sleeves to not fall behind.

Incoming Call - 8:28 PM

Hi, it's Sara, the AI Assistant of Dodo Animal Hospital. This call may be reviewed for safety. How can I help you?

I'd like to make an appointment for tonight.

General Suggestions (25)

- EXISTING Memory**
Blue Cross Animal Hospital is a low cost veterinarian clinic for dogs and cats.
Action: This information already exists in the AI's knowledge base.
- CONFLICT Memory**
cat castration is fifty bucks
Cat castration \$130 (anesthesia included only; medications NOT included; \$25 additional charge if cat is wild).
Action: This conflicts with existing knowledge and will replace the conflicting memory item.
- NEW Memory**
Pet Wellness Exams are available.
Action: This will be added as a new memory item.

Don't just keep up.
