

Test all cats that present with vague signs of disease, anorexia, or nonspecific illness to evaluate for pancreatitis

### Investigate

- Consider additional diagnostics
  - Ultrasound
  - Radiographs
  - Quantitative Spec fPL<sup>®</sup> Test (test code 2493)
- Check for risk factors and concurrent disease
  - Inflammatory bowel disease
  - Hepatitis
  - Hepatic lipidosis
  - Diabetes mellitus

### Manage

- Provide supportive therapy
  - Fluids
  - Pain management
  - Antiemetics
- Treat primary disease appropriately, if present

### Monitor

- Trend with quantitative Spec fPL Test
- Recheck fPL levels in 2–3 weeks or sooner if clinical signs develop or worsen
