TEST: EC1

Cytology Source

LIVER

## Clinical History

Soft mobile 8x5x5 cm mass. Slides 1 and 2 from this site, 1 stained 2 fixed but not stains. Concern for lipoma vs other neoplasia vs abscess. Seems to have had trouble swallowing

## Pathologist's Report

## MICROSCOPIC DESCRIPTION:

The smears are of good quality and consist of many clear lipid droplets, several large clusters of benign lipocytes, and few red blood cells. There are no other cell types.

## MICROSCOPIC INTERPRETATION:

Benign lipoma.

## COMMENTS:

If there are discrepancies between this report and your clinical impressions, please do not hesitate to call me. Thank you.
